Research Skills for Management Studies Alan Berkeley Thomas,2004-08-02 The recent growth of interest in the systematic study of management has transformed a once neglected area of research into one that now attracts a huge number of postgraduate students Despite this there has been a distinct lack of research guides tailored specifically for management studies Designed as a comprehensive introduction to the main phases of a research project this textbook fills that void It leads students from the very first stage of initiation through to final publication considering the nature of research skills and the fundamental elements of the research process whilst exploring the institutional context in which management research is carried out Taking current debates and the surrounding philosophical and strategic issues in hand this book combines the key theories with the best practical advice to offer a completely rounded introduction to the topic It includes guidance and specific reference to real management research projects as well as case examples activities and further reading lists and is essential reading for anyone undertaking a management studies research project

Business Model Innovation as a Dynamic Capability Marc Sniukas,2020-07-21 This study adopts a dynamic capabilities perspective to explore the activities and processes through which business model innovations arise in established organisations New and innovative business models are fundamental to the commercialisation of the latest technologies performance and competitive advantage as well as value creation for customers the focal company and its ecosystem Yet our current understanding of how established companies design and implement new business models is limited by a lack of empirical research Based on a review of relevant literature business model innovation is presented and explored as a dynamic capability The book subsequently uses proven methodologies to gather and analyse data from five case studies in the manufacturing financial services media consulting and healthcare industries The framework developed here offers a novel understanding of how business model innovations come about in established organisations a practice it dubs crafting business models in statu nascendi

Understanding the Myth of High Growth Firms Malin Brännback,Alan L. Carsrud,Niklas Kiviluoto,2013-11-08 In this volume the authors challenge some long held assumptions about entrepreneurial firms held by academics public policy makers investors and even entrepreneurs themselves The first is assumption is that growth is what really differentiates an entrepreneurial firm from a small business The second is that growth is always good Third if growth is rapid and or high growth it is even better Drawing from a fresh review of the literature their own primary research and experience in entrepreneurial ventures the authors argue that the relationship between growth and firm performance is in fact inconclusive Despite the strength of contemporary bias there is strong evidence that the growth

profitability relationship is problematic. For example, rapid growth may lead to considerable organizational challenges that can seriously constrain a firm's ability to generate sustainable profits. Also, it is not uncommon that a growth firm becomes a victim of its own success. Using examples from industries as diverse as airlines, accounting, biotechnology, information technology, personal products, wineries, and food establishments, the authors highlight limitations to research due to variations in the choice of growth indicators, the calculation of growth measures, the measurement periods, and whether objective or subjective measures have been used. Moreover, researchers have equated growth with high growth and almost automatically assumed that this also means high technology, while policy makers appear to have interpreted this as high employment. Armed with more precise definitions and understandings of key concepts and the nature of their causality, the authors consider the implications of restoring profitability to the core of entrepreneurship for future research, firm strategy, financing, organizational structure, resource allocation, and public policy.

Open Innovation

Pascal Latouche, 2019-04-30. The corporate start-up incubator is currently developing in large companies as an essential approach to open innovation. It faces a global system involving varied contexts, issues, and actors. Its implementation is an art, and to succeed, the corporate incubator must become a real interaction architect. Using testimonials and real case studies, the author takes a dive into the structural and social mysteries of corporate incubators. By analyzing the complex mechanisms of interactions, this book decrypts and reveals the keys to the success of these devices and to opening innovation in a broad sense. The concept of an interaction architect is related to the art of building fruitful interactions within human systems. Being aware that social systems exist is good, but knowing how to manage them is better.

Research Methods for Business Students Mark N. K. Saunders, Mark Saunders, Philip Lewis, Adrian Thornhill, 2000. Research Methods for Business Students. This text provides students with the necessary knowledge and skills for the successful completion of a piece of business research. Written as a self-study guide, the student is taken step by step through the research process, while real-life case studies, worked examples, and student activities bring to life the realities of undertaking business research. The second edition has been written against a background of rapid change. The availability of powerful analysis software and the accessibility of the Internet provide more sophisticated means of accessing and analysing data and also exciting new avenues for research. Furthermore, the body of knowledge on research methods has expanded since the first edition. This edition has therefore been fully updated to take account of these changes. Now in two colours, this is a comprehensive, effective, and accessible learning resource. Features new to the second edition: Focus on utilising new technologies; Inclusion of relevant Internet addresses; Advice on use of on-line surveys; Worked examples and case studies have been updated; Additional worked examples and diagrams; Fully revised section on research.
