Psychotherapy with Infants and Young Children Alicia F. Lieberman, Patricia Van Horn, 2008-04-08 This eloquent book presents an empirically supported treatment that engages

parents as the most powerful agents of their young children's healthy development. Child parent psychotherapy promotes the child's emotional health and builds the parent's capacity to nurture and protect, particularly when stress and trauma have disrupted the quality of the parent-child relationship. The book provides a comprehensive theoretical framework together with practical strategies for combining play, developmental guidance, trauma-focused interventions and concrete assistance with problems of living. Filled with evocative 'how to do it' examples, it is grounded in extensive clinical experience and important research on early development, attachment, neurobiology and trauma.

Contemporary Perspectives on Social Learning in Early Childhood Education Olivia Saracho, Bernard Spodek, 2007-06-01 Social epistemology is a broad set of approaches to the study of knowledge and to gain information about the social dimensions. This intellectual movement of wide cross-disciplinary sources reconstructs the problems of epistemology when knowledge is considered to be intrinsically social. In the first chapter, Social Epistemology and Social Learning, Olivia Saracho and Bernard Spodek discuss the social and historical contexts in which different forms of knowledge are formulated based on the perspective of social epistemology. They also discuss the emergence of social epistemology which guides researchers to investigate social phenomena in laboratory and field settings. Social factors external to the appropriate business of science have a major impact in the social studies researchers' historical case studies. Thus, social studies researchers may be considered social epistemologists because a) they focus on knowledge of social influences and b) they infer epistemologically significant conclusions from their sociological or anthropological research. In addition, analyses indicate that studies of scientific paradigms are basically a struggle for political power rather than reflecting reliable epistemic merit. Social studies researchers focus on knowledge of social influences on knowledge which is analogous to the knowledge of the social epistemologists. They also use their sociological or anthropological research to infer epistemologically significant conclusions.

Handbook of Child Maltreatment Richard D. Krugman, Jill E. Korbin, 2022-02-22 The second edition of this successful handbook edited by well-known experts in this field includes core questions in the field of child abuse and neglect. It addresses major challenges in child maltreatment work starting with 'What is child abuse and neglect?' and then examines why maltreatment occurs and what are its consequences. The handbook also addresses prevention, intervention, investigation, treatment as well as civil and criminal legal perspectives. It comprehensively studies the issue from the perspective of a broader international and cross-cultural human experience. Apart from a thorough revision of existing chapters, this edition includes many new chapters covering recent developments in this area and other issues not covered in the first edition. There is more focus on substance abuse, psychological abuse and on social and community involvement and public health provisions in the prevention of child maltreatment. The handbook examines what is known now and more importantly what remains to be researched in the coming decades to help abused and neglected children, their families and their communities, thereby taking the field forward.
