In Depth Remote Work Productivity For Beginners For Women:

Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era Wheatley, Daniel, Hardill, Irene, Buglass, Sarah, 2021-04-16 With the introduction of policies to combat COVID 19 far greater numbers of employees across the globe including those with limited job autonomy have moved to undertake their entire job at home. Although challenging in the current climate embracing these flexible modes of work such as working at home including relevant investment in technology to enable this will not only deliver potential organizational benefits but also increase the adaptability of the labor market in the short and longer terms. Although perhaps not the central concern of many in the current climate good home based work is achievable and perhaps even a solution to the current work based dilemma created by COVID 19 and should be a common goal for individuals, organizations and society. Research also has shifted to focus on the routines of workers, organizational performance and well being of companies and their employees along with reflections on the ways in which these developments may influence and alter the nature of paid work into the post COVID 19 era. The Handbook of Research on Remote Work and Worker Well Being in the Post COVID 19 Era focuses on the rapid expansion of remote working in response to the global COVID 19 pandemic and the impacts it has had on both employees and businesses. The content of the book progresses understanding and raises awareness of the benefits and challenges faced by large scale movements to remote working considering the wide array of different ways in which the large scale movement to remote working is impacting working lives and the economy. This book covers how different fields of work are responding and implementing remote work along with providing a presentation of how work occurs in digital spaces and the impacts on different topics such as gender dynamics and virtual togetherness. It is an ideal reference book for HR professionals, business managers, executives, entrepreneurs, policymakers, researchers, students, practitioners, academicians and business professionals interested in the latest research on remote working and its impacts.

Implications of Remote Work on Employee Well-being and Health Rolf Van Dick, Anja Baethge, Nina M. Junker, 2024-12-31 The rapidly growing field of organizational psychology has over the last few years become one of the fastest growing branches of psychology. Particularly taking care of the health and well being of employees in the workplace cannot only be considered a moral imperative but has begun globally to be recognised as driving forces of socio economic growth. Employee health and well being is crucial to organizations in regards to improved productivity, employee performance, job satisfaction, staff retention, reduced absenteeism, increased job satisfaction and work commitment. Thus research relating to employee well being and health has produced some significant results and furthered our understanding of this subsection of the organizational psychology field. The evolution of the way we work has also gained traction in the organizational psychology field in relation to remote working. Since the Covid 19 pandemic many workforces have adapted more or less permanently to this form of working. Frontiers has organized a series of Research Topics to highlight the latest advancements in research across the field of organizational

psychology and the implications of remote working This editorial initiative of particular relevance led by Professor Rolf van Dick Specialty Chief Editor of the Employee Well being and Health section alongside Dr Anja Baethge and Dr Nina Junker is focused on the implications of remote working on employee well being and health
