Space, Structures and Design in a Post-Pandemic World Thomas Fisher, 2022-04-27 Pandemics have long term effects on how we live and work and the COVID 19 pandemic was no exception accelerating us into a digital economy in which people increasingly work shop and learn online transforming how we use space in person and remotely Space Structures and Design in a Post Pandemic World explores the rebalancing of our physical and digital interactions and what it means for the built environment going forward This book examines the effect of the pandemic on our use of land interior space energy and transportation as well as on our approach to design wealth work and practice Author Thomas Fisher also discusses the plagues of institutional racism and climate change that coincided with the COVID 19 pandemic and how these were interrelated At the same time as all of this the automation of all or part of many jobs continued unabated eliminating much of the work that people did before COVID 19 arrived This text discusses how we might leverage the under utilized human talent and material assets all around us to rebuild our communities and our economy in more creative ways for a more equitable resilient future Space Structures and Design in a Post Pandemic World will influence anyone interested in how design thinking can transform how we see the world and those looking for new ways to understand what the COVID 19 pandemic means and what opportunities it creates for our environments

Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of

offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

Remote Work and Sustainable Changes for the Future of Global Business Ali, Mohammed, 2021-06-25. There is a void of research and other academic materials to support stakeholders operating within industry and the service sector with respect to their perceptions and experiences of remote work, particularly in the context of global business sustainability and change management. As more businesses consider remaining and maintaining a remote workforce, it is of paramount importance that new research be conducted regarding the multifaceted area of remote work and sustainable change for global business. *Remote Work and Sustainable Changes for the Future of Global Business* raises awareness of the multifaceted area of remote work in the context of sustainable change. In particular, it explores remote technology in an attempt to cope with the changing landscape of work environments amidst global change from a sociotechnical perspective. This book provides insight into the challenges both national and international businesses face during a world crisis. Covering topics such as crisis management, the human cloud, and virtual collaboration, this book is essential to business managers, project managers, business clusters, entrepreneurs, higher education practitioners, faculty, and PhD researchers, educational boards, technology vendors, and firms, and academic researchers.
