Bopp,Linda C. Smith,2001 Thoroughly revised and expanded to reflect current developments in the field this text is designed

to provide the beginning student of library and information science with an overview of the most important tools for general reference work and the concepts and theory behind today's reference services. The 21 chapters are divided into two parts. The first 11 chapters deal with concepts and theory and are topical. They cover such areas as ethical aspects of reference services, reference interview, the principles and goals of library instruction, bibliographic control and search strategies, training and continuing education for reference staff, the evaluation of reference services and the management of these services. In many cases, specific applications in different types of libraries are pointed out. Expanded coverage of electronic reference service is provided by two full chapters devoted to basic principles and current trends in this area. A separate chapter covers unique approaches to reference service for special groups. Part 2 describes the general principles and sources for selecting and evaluating reference tools and the principles for building a reference collection. The remaining chapters discuss the characteristics and uses of particular types of reference tools. This new edition describes a greater number of titles of each type as well as the formulation of strategies for the effective use of specific sources or groups of sources. Scenarios in particular library settings conclude each chapter, offering realistic reference questions and appropriate search strategies. Throughout the text, boxes are used to highlight specific issues, concepts and search strategies that underlie contemporary reference services. Selected important sources for further reading are listed at the end of each chapter. This text presents the essential theory and practical knowledge necessary for an initial reference course. Its broad scope and organizational clarity should benefit students and practitioners alike.

**Instructor**, 2008. **Teaching Writing Online** Scott Warnock, 2009. How can you migrate your tried and true face-to-face teaching practices into an online environment? This is the core question that Scott Warnock seeks to answer in *Teaching Writing Online: How and Why*. Warnock explores how to teach an online or hybrid writing course by emphasizing the importance of using and managing students' written communications. Grounded in Warnock's years of experience in teaching teacher preparation, online learning and composition scholarship, this book is designed with usability in mind. Features include how to manage online conversations, responding to students, organizing course material, core guidelines for teaching online and resource chapter and appendix with sample teaching materials. More than just the latest trend, online writing instruction offers a way to teach writing that brings together theoretical approaches and practical applications. Whether you are new to teaching writing online or are looking for a more comprehensive approach, this book will provide the ideas and structure you need.
