English-Medium Instruction in Higher Education in Hong Kong Jack Pun, Wenyun Jia, 2025-12-11 This book explores issues of teaching science technology engineering and math STEM through the medium of English in the context of higher education in Hong Kong It analyses policy issues and language challenges faced by university students and pedagogical

strategies for the professional development of English Medium of Instruction (EMI) teachers in Hong Kong as a focus case is valuable because nearly 60% of government-funded university programmes are STEM or science-related while over 90% of the student population speaks Chinese as a first language but also speak and write English due to local language policies and Hong Kong's colonial history making it a useful site for EMI research. By providing an evidence-based pedagogically focused analysis of teacher and student classroom practices and their perceptions, this book sheds light on ways to improve the quality of instructional practices and effective scaffolding in different types of EMI classrooms in Hong Kong and in similar contexts around the world. The examples of the EMI lessons with annotated notes which showcase good practices of EMI teaching will be particularly valuable to university EMI coordinators, content subject and English teachers and instructors doing EMI professional development courses.

"Free AI Tools for Teachers 2025" Deepak D., 2025-09-18 Teaching has always been about balance: balancing lessons, grading, parent communication and the unique needs of every student. However, in 2025, maintaining that balance is more challenging than ever. Teachers are stretched thin, and the demands of modern classrooms can feel overwhelming. That's where artificial intelligence (AI) comes in. But let me be clear: this book isn't about replacing teachers with robots or adding more technology headaches to your plate. It's about introducing you to free, easy-to-use AI tools that can reduce your workload, spark creativity, and free up time for what matters: connecting with your students. When I started researching AI in education, I was amazed by how many powerful tools were available at no cost. Teachers were using them to draft lesson plans in minutes, generate practice quizzes, provide personalised feedback, and even keep their classrooms more organised. The more I explored, the clearer it became: every teacher deserves access to these tools, and most importantly, guidance on how to use them effectively.

Leveraging Today's Social Media Mark D. Benigni, Barbara A. Haefner, Susan O. Moore, Jeffrey F. Solan, 2025-12-11 *Leveraging Today's Social Media: Its Role in School District Improvement and Success* chronicles the experiences of two superintendents, Mark Benigni and Jeff Solan, as they navigate the challenges and opportunities of social media in their respective school districts. Acknowledging the concerns surrounding online safety and digital citizenship, the authors emphasize the crucial role of education in empowering students to thrive in the digital age. Explore how schools can leverage social media to enhance student learning, from showcasing student work and facilitating college connections to improving communication with families and fostering community engagement. It provides practical guidance on implementing digital citizenship programs, developing appropriate social media policies, and harnessing the power of online platforms for recruitment, professional development, and operational efficiency. Through their shared insights and real-world examples, Benigni and Solan offer a valuable resource for educators seeking to navigate the complexities of social media and unlock its potential to transform teaching and learning. They encourage exploring social media's potential in various school functions before jumping on the bandwagon.
