Exploring Technology-Infused Education in the Post-Pandemic Era Tomei, Lawrence A., Carbonara, David D., 2024-08-05 In the aftermath of the 2020 2022 pandemic educators find themselves grappling with the decision to revert to traditional instructional methods or embrace the transformative power of 21st century technologies The swift integration of virtual classrooms videoconferencing and social media during the pandemic has left teachers navigating uncharted territory Many who once vehemently resisted technology now stand on the precipice of a digital revolution in education This dichotomy poses a pressing problem a dearth of documented research and guidance for educators seeking to measure the true value of these technologies in the post pandemic era Exploring Technology Infused Education in the Post Pandemic Era offers guidance and solutions to the challenges faced by educators As teachers stand on the brink of a pivotal decision the research community lags behind in providing the necessary insights to inform their choices The questions loom large What technologies emerged during the pandemic and have they proven effective in the classroom Can these innovations seamlessly coexist with traditional instructional methods The void in documented research leaves educators in a quandary lacking the evidence needed to make informed decisions about the integration of technology into their teaching practices This critical gap impedes progress and hinders the unleashing of the full potential of 21st century educational tools

Artificial Intelligence and Society Dr. R. B. Konda, Dr. Mahesh M. Ganwar, Prof. Kaveri Kori, Dr. Hanmanthappa Sedamkar, Dr.

Manikamma S., Dr. Saibanna. & Dr. Mitradevi Halimani,2024-11-08 The integration of AI powered e gamified modules in education has significantly impacted students scientific attitudes and academic achievement in science This study investigates how AI driven gamification enhances engagement critical thinking and problem solving skills leading to improved academic performance AI enables personalized learning experiences by adapting to individual student needs thus fostering a more interactive and learner centered approach E gamified modules provide immediate feedback motivating students to correct errors and reinforce learning The main aim of the study is to find out whether there is any significant difference between pre test post test mean scores of secondary school students taught with and without AI powered e gamified modules in science 80 Samples were chosen by employing purposive sampling technique The researcher has used standardized PhET simulation modules The results show that the post test mean scores of the experimental group are significantly different than that of the control group The study suggests that when students are exposed to AI powered gamified learning environments they develop a more positive disposition toward scientific methods and show measurable improvements in performance This research highlights the potential of AI in transforming traditional education by making learning more dynamic personalized and effective thereby fostering a deeper understanding of science and its applications
