[Defense Policy And Strategic Development: Coordination Between Japan And Taiwan](#) Fu-kuo Liu, Dean Karalekas, Masahiro Matsumura, 2021-08-10 Many possibilities for bilateral coordination between Taiwan and Japan exist in the face of China s rapid military development growing international influence and increasingly belligerent regional behavior This volume examines several facets of such potential coordination between Japan and Taiwan in such areas as Security Policy Artificial Intelligence Cybersecurity Nuclearization Missile Defense and others

The Digital Silk Road David Gordon, Meia Nouwens, 2022-11-29 Concerns about China s ambitions to return to global centre stage as a great power have recently begun to focus on the Digital Silk Road DSR an umbrella term for various activities commercial and diplomatic of interest to the Chinese government in the cyber realm Part of or a spin off from the 2013 Belt and Road Initiative by 2020 the DSR had become a focal point of China s foreign policy But the DSR remains ill defined and poorly understood At the heart of such concerns is not that Chinese technology companies are becoming globally competitive but rather that Beijing could use them to rewire the global digital architecture from physical cables to code Dominance by Chinese technology could shift global norms from a free cyber commons to competing systems of cyber sovereignty or cyber freedom This Adelphi book brings together eight experts to examine the development of the DSR explore its impact on economics security and governance in recipient countries and assess the broader impact on patterns of economic and technological dependence on the emerging rules and norms of tech globalisation and on global geopolitics and great power relations Beijing has grasped the opportunity to leverage the entrepreneurial strengths of its private tech sector to gain prominence in the world s digital ecosystem But the more interventionist Beijing becomes the more Chinese firms will be seen as instruments of the state and the greater the pushback against Chinese technology and the DSR may be To achieve great power status and global centrality Beijing might ultimately need to change tack How it

innovates in further rolling out Chinese tech across the world and what the DSR will then look like will have far reaching impacts on global economics politics and security

Data Cartels Sarah

Lamdan, 2022-11-08 In our digital world data is power Information hoarding businesses reign supreme using intimidation aggression and force to maintain influence and control Sarah Lamdan brings us into the unregulated underworld of these data cartels demonstrating how the entities mining commodifying and selling our data and informational resources perpetuate social inequalities and threaten the democratic sharing of knowledge Just a few companies dominate most of our critical informational resources Often self identifying as data analytics or business solutions operations they supply the digital lifeblood that flows through the circulatory system of the internet With their control over data they can prevent the free flow of information masterfully exploiting outdated information and privacy laws and curating online information in a way that amplifies digital racism and targets marginalized communities They can also distribute private information to predatory entities Alarmingly everything they re doing is perfectly legal In this book Lamdan contends that privatization and tech exceptionalism have prevented us from creating effective legal regulation This in turn has allowed oversized information oligopolies to coalesce In addition to specific legal and market based solutions Lamdan calls for treating information like a public good and creating digital infrastructure that supports our democratic ideals
