Beginner Friendly Ai Productivity Tools For Beginners For College Students:

Artificial Intelligence Literacy in Higher Education Imre Fekete, 2025-07-08 This book explores the concept of artificial intelligence AI literacy within higher education addressing both instructors and students preparedness to engage with AI technologies responsibly and effectively By synthesising existing frameworks and empirical studies alongside presenting two original research studies the book bridges theoretical foundations with practical applications tailored for modern educational contexts Practical recommendations include methods to develop AI literacy skills focusing on ethical awareness technological competence and the potential for AI to enhance teaching and learning processes Aimed at higher education instructors stakeholders and students the book offers actionable insights and tools for fostering informed and critical engagement with AI aligned with lifelong learning goals and professional development needs

Fundamentals of Artificial Intelligence

Suneel Kumar Duvvuri, 2025-11-01 Artificial Intelligence AI has moved from being a futuristic idea to something we use in everyday life This book aimed to introduce first year undergraduate students to AI in an easy to understand non technical way We started by explaining what AI is its history and its main areas like Machine Learning Computer Vision Natural Language Processing Robotics and Knowledge Engineering We also saw how AI is used in real life such as in healthcare finance agriculture education and transportation showing how it can solve practical problems Understanding ethics and fairness in AI is very important AI systems must be designed to be fair safe and respectful of privacy We discussed issues like bias accountability transparency and inclusivity so students know how to use AI responsibly A key part of this book was about Generative AI and Prompt Engineering Tools like ChatGPT Gemini Hugging Face and Perplexity show how AI can help with writing research coding content creation and learning Students learned how to write good prompts to get accurate useful and creative results from AI We also explored how AI can help in education business creative writing designing videos presentations thumbnails and branding We looked at new trends and the future of AI encouraging students to think about how AI will continue to change industries research and daily life The goal is to give students knowledge understanding and a responsible mindset when using AI In short this book gives a solid foundation in AI It shows how AI can be a helpful partner in learning work and creativity By combining theoretical insights with practical applications and ethical considerations students are empowered to explore innovate and make informed decisions in a world increasingly influenced by artificial intelligence AI is not just a tool for the future it is already part of our lives today helping us work smarter learn faster and think bigger

Chatgpt and Other Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback

provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies
