Leading with Empathy Carolyn Reily, 2025-02-28. Focusing on empathy as a key tool, this book examines the impact of hybrid working on staff mental health and how business leaders, managers, coaches, and mentors can create a positive and motivated hybrid workforce. Part of the *Business in Mind* series, it is for anyone who is managing remote workers, whether individuals or teams. As the world of work has changed drastically since the COVID-19 pandemic, with more staff working from home, the importance of nurturing staff well-being is more important than ever. Even though businesses are seeing the benefits of working at home, it can also create challenges. With the latest research and studies, this book explores practical ideas for finding the right working model and how to develop an appropriate leadership style. Uniquely, it discusses the neuroscience of stress to identify ways to improve workers' mental health and inform how managers can use this to create a positive work environment.

De Gruyter Handbook of Digital Cultures Grant Bollmer, Katherine Guinness, Yiğit Soncul, 2025-09-22. As Digital Cultures becomes the dominant term used by many across a variety of intellectual fields to describe the social, aesthetic, and political impact of digital media, it is necessary to provide a reference volume that specifies and defines the bounds of scholarly debates and curricular outlines for an otherwise amorphous interdisciplinary space. This handbook provides a comprehensive reference for the varied methodologies, historical frames, and theoretical perspectives essential for the study of Digital Cultures today. In outlining these foundations, it serves as a practical guide for educators and

students into the broad range of perspectives grouped together for the critical historical and social scientific study of digital media. It also looks into the future and outlines an agenda for future research by examining not only the origins of the concept of Digital Culture but emerging topics and themes still in development such as the relation between digital technology and climate change, artificial intelligence and knowledge, sensation and aesthetics, and the rise of new infrastructures reinventing not only the built environment but the boundaries of nations and sovereignty.
