Design in the Era of Industry 4.0, Volume 1 Amaresh Chakrabarti, Vishal Singh, 2023-07-25 This book showcases cutting-edge research papers from the 9th International Conference on Research into Design (ICoRD 2023), the largest in India in this area, written by eminent researchers from across the world on design processes, technologies, methods, and tools, and their impact on innovation for supporting design for a connected world. The theme of ICoRD 23 has been *Design in the Era of Industry 4.0*. Industry 4.0 signifies the fourth industrial revolution. The first industrial revolution was driven by the introduction of mechanical power, such as steam and water engines, to replace human and animal labour. The second industrial revolution involved the introduction of electrical power and organised labour. The third industrial revolution was powered by the introduction of industrial automation. The fourth industrial revolution involves the introduction of a combination of technologies to enable connected intelligence and industrial autonomy. The introduction of Industry 4.0 dramatically changes the landscape of innovation, and the way design, the engine of innovation, is carried out. The theme of ICoRD 23, *Design in the Era of Industry 4.0*, explores how Industry 4.0 concepts and technologies influence the way design is conducted and how methods, tools, and approaches for supporting design can take advantage of this transformational change that is sweeping across the world. The book is of interest to researchers, professionals, and entrepreneurs working in the areas of industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems, and services.
