Not only does Coburn present a sound problem-solving process to teach students to recognize a problem, organize a procedure, and formulate a solution, the text encourages students to see beyond procedures in an effort to gain a greater understanding of the big ideas behind mathematical concepts. **American Machinist & Automated Manufacturing**, 1925. **Modern machine shop tools**, William Humphrey Van Dervoort, 1903. **Machine Shop Tools and Shop Practice**, William Humphrey Van Dervoort, 1916. *Proceedings*, 1990. **Modern Machine Shop Tools, Their Construction, Operation and Manipulation, Including Both Hand and Machine Tools ...** William Humphrey Van Dervoort, 1903. **Modern machine shop tools, a treatise describing the construction, operation and manipulation of hand and machine tools**, William Humphrey Van Dervoort, 1903. *Artificial Intelligence in Real-time Control (AIRTC-2000)*, I. This *Proceedings* contains the papers presented at the 9th IFAC AIRTC 2000 Symposium on Artificial Intelligence in Real Time Control 2000, held at Budapest Polytechnic, Hungary, on 2-4 October. AIRTC 2000 builds on the excellent reputation of previous meetings in the series for providing top quality papers in this important research field. A positive development illustrated by this *Proceedings* is a new trend towards pragmatism in the research field. Examples of this trend are an increase in the number of actual industrial applications, support for more widespread use of new sophisticated technologies, e.g., materials design, further intertwining of artificial intelligence and control theory methods that reduces the reliance on blind faith, still too often associated with AI methods. Many things have changed since the first AIRTC event in 1988. Two examples illustrate the change in the general attitude of the IFAC family in 1990: one of the major closing presentations of the IFAC World Congress warned the control community about the coming hordes of AI people. In 1999, one of the plenary papers at the IFAC World Congress pointed out that the AI-based methods form a natural extension of control theory to the class of non-linear systems with incomplete information, at least as far as the optimisation is concerned. This contrast in attitudes shows how, during the past decade, many AI people have embraced control theory and

many control people have learned the basics of AI This Proceedings serves to continue this excellent dialogue by providing many quality papers which link both fields *American Bee Journal* ,1907 Includes summarized reports of many bee keeper associations
