*AI Based Solutions for Inclusive Quality Education* K.M. Soni, Nitasha Hasteer, Aditi Bhardwaj, Rahul Sindhwani, J. Paulo Davim, 2025-09-30 *AI Based Solutions for Inclusive Quality Education* helps readers discover practical AI tools for diverse learning styles and abilities fostering inclusivity in education and maximizing the individual potential of students and educators. It provides cutting edge solutions designed to remove barriers due to accessibility and create an equitable classroom. Through practical applications and case studies the book explores the power of AI in creating personalized learning pathways and methods of engagement in the classroom while emphasizing that the human touch with empathy and critical thinking remains central to the learning process. It addresses concerns about the ethical development and deployment of AI in education. Features: Discusses a topic that is at the forefront of concerns in the education sector with the disruptive impact of advances in AI. Provides explanations for specific AI platforms and tools along with their features and applications in education. Includes case studies and discusses inclusivity and the lessons learned from each AI application. Explains how to ethically handle bias, privacy and transparency in AI based solutions in education. Serves as a comprehensive guide for educators, policymakers and technology developers interested in the power of AI in educational environments. This book serves as a timely reference in the current era of AI tools and education. It is written for those who work in the education sector as well as researchers, academicians, undergraduate and graduate students, those involved with undergraduate teaching in critical thinking and problem solving for information systems, information technology, computer science and engineering and all teaching institutions where AI tools have been or will be introduced. *Chatgpt and Other Generative AI Tools* Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence (GAI) have found rapidly growing use in medicine, science and daily life. Large language models (LLMs) opened up new avenues in particular for education. LLMs have been used to create interactive educational content for students, stimulate their curiosity, generate code explanations and develop assessment questions. Additionally, LLMs have been applied for language practice, anxiety alleviation and feedback provision. In higher education, LLMs have shown potential for assisting in medical exam preparation and clinical decision making. In school education, LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback. More recently, LLM based applications such as ChatGPT have been used to generate teaching materials or assessment tasks across different subjects. The fields understanding of the effects of the use of LLM based applications in classroom teaching, however, is still in its infancy. GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content. However, it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution. Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies. **Improving Student Assessment With Emerging AI**
