Quick Entry Level Remote Jobs Ideas 2025:

Waiting for Robots Antonio A. Casilli, 2025-01-08 An essential investigation that pulls back the curtain on automation like AI to show human workers hidden labor Artificial Intelligence fuels both enthusiasm and panic Technologists are inclined to give their creations leeway pretend they re animated beings and consider them efficient As users we may complain when these technologies don t obey or worry about their influence on our choices and our livelihoods And yet we also yearn for their convenience see ourselves reflected in them and treat them as something entirely new But when we overestimate the automation of these tools award winning author Antonio A Casilli argues we fail to recognize how our fellow humans are essential to their efficiency The danger is not that robots will take our jobs but that humans will have to do theirs In this bracing and powerful book Casilli uses up to the minute research to show how today s technologies including AI continue to exploit human labor even ours He connects the diverse activities of today s tech laborers platform workers like Uber drivers and Airbnb hosts micro workers including those performing atomized tasks like data entry on Amazon Mechanical Turk and the rest of us as we evaluate text or images to show we re not robots react to Facebook posts or approve or improve the output of generative AI As Casilli shows us algorithms search engines and voice assistants wouldn t function without unpaid or underpaid human contributions Further he warns that if we fail to recognize this human work we risk a dark future for all human labor Waiting for Robots urges us to move beyond the simplistic notion that machines are intelligent and autonomous As the proverbial Godot robots are the bearers of a messianic promise that is always postponed Instead of bringing prosperity for all they discipline the workforce so we don t dream of a world without drudgery and exploitation Casilli s eye opening book makes clear that most automation requires human labor and likely always will shedding new light on today s consequences and tomorrow s threats of failing to recognize and compensate the click workers of today Computerworld ,1977-11-21 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Country Life** ,1984
