Proceedings of the IRE. Institute of Radio Engineers,1961 **Wallaces Farmer** ,1966 **AI-generated Tweets Detection** Jui Yu Huang,2023 With the increasing number of social media users information on social media platforms like Twitter holds a significant influence on people Additionally the development of artificial intelligence has led to the creation of sophisticated content generation techniques making it difficult to distinguish whether a message came from a real person or an AI bot It is crucial to investigate the effectiveness of existing detection methods on identifying the content originating from this technology Despite previous studies 1 5 7 have focused on using various artificial intelligence techniques to detect tweets generated by deep neural network models and achieved some impressive results The content generation techniques

are also growing dramatically The language model such as GPT 3 is well known for its ability to generate human like content it is worth researching the alternatively better method to detect the tweet generated by this technology In this research we generated our own dataset with GPT 3 model using several different approaches such as Bidirectional Encoder Representations from Transformers BERT and GPT 3 itself on detecting both Tweepfake dataset and our own GPT 3 generated dataset Among the different approaches tested to detect AI generated tweets we have founded that BERTweet BERT pre trained with English tweets approach showed remarkable accuracy Specifically it achieved a detection accuracy of over 92% when applied to the Tweepfake dataset and a detection accuracy rate of over 95% when applied to our own dataset generated using GPT 3 This highlights the effectiveness of the BERTweet approach in detecting deepfake tweets and its potential to be applied in real world scenarios to counter the spread of fake information on social media platforms However the GPT 3 as a detector only achieved 50% to 60% accuracy which represent that GPT 3 is not effective in classification task

Twitterbots Tony Veale, Mike Cook, 2018-09-11 The world of Twitterbots from botdom s greatest hits to bot construction to the place of the bot in the social media universe Twitter offers a unique medium for creativity and curiosity for humans and machines The tweets of Twitterbots autonomous software systems that send messages of their own composition into the Twittersphere mingle with the tweets of human creators the next person to follow you on Twitter or to like your tweets may not a person at all The next generator of content that you follow on Twitter may also be a bot This book examines the world of Twitterbots from botdom s greatest hits to the hows and whys of bot building to the place of bots in the social media landscape In *Twitterbots* Tony Veale and Mike Cook examine not only the technical challenges of bending the affordances of Twitter to the implementation of your own Twitterbots but also the greater knowledge engineering challenge of building bots that can craft witty provocative and concise outputs of their own Veale and Cook offer a guided tour of some of Twitter s most notable bots from the deadpan *big_ben_clock* which tweets a series of BONGs every hour to mark the time to the delightful *pentametrone* which finds and pairs tweets that can be read in iambic pentameter to the disaster of Microsoft s *TayAndYou* which learned conspiracy theories racism and extreme politics from other tweets They explain how to navigate Twitter s software interfaces to program your own Twitterbots in Java keeping the technical details to a minimum and focusing on the creative implications of bots and their generative worlds Every Twitterbot they argue is a thought experiment given digital form each embodies a hypothesis about the nature of meaning making and creativity that encourages its followers to become willing test subjects and eager consumers of automated creation Some bots are as malevolent as their authors Like the bot in this book by Veale Cook that uses your internet connection to look for opportunities to buy plutonium on The Dark Web PROSECCOnetwork If writing is like cooking then this new book about Twitter bots is like Apple Charlotte made with whale blubber instead of butter PROSECCOnetwork These bot critiques generated at <https://cheapbotsdonequick.com> source PROSECCOnetwork *Le Journal de physique et le radium* ,1957 Beginning in 1922 includes Proces verbaux et
