,2000-09 *Winning Decisions* J. Edward Russo, Paul J.H. Schoemaker, 2001-12-26 Business revolves around making decisions often risky decisions usually with incomplete information and too often in less time than we need Executives at every level in every industry are confronted with information overload less leeway for mistakes and a business environment that changes rapidly In light of this increased pressure and volatility the old fashioned ways of making decisions depending on intuition common sense and specialized expertise are simply no longer sufficient Distilling over thirty years of groundbreaking research *Winning Decisions* written by two seasoned business advisers and world leaders in behavioral decision studies is a comprehensive one of a kind guide to the proven methods of making critical business decisions confidently quickly and correctly Decision making is a business skill which managers often take for granted in themselves and others but it is not as easy as some might think The authors whose expertise has been sought out by over a hundred companies including Arthur Andersen Hewlett Packard IBM and Unilever contend that decision making like any other skill must be developed and honed if it is to be used effectively *Winning Decisions* offers step by step analyses of how people typically make decisions and provides invaluable advice on how to improve your chances of getting your next big decision right the first time The book is packed with worksheets tools questionnaires case studies and anecdotes analyzing major decisions made by organizations like British Airways NASA Shell Oil and Pepsi Some of the proven straightforward techniques covered in *Winning Decisions* include how to Reframe issues to ensure that the real problem is being addressed Improve the quality and quantity of your options Convert expert yet conflicting opinions into useful insights Make diversity of views and conflict work to your advantage Foster efficient and effective group decision making Learn from past decisions your own and those of others With *Winning Decisions* managers and other professionals now have access to a proven set of skills and strategies they need for making the right decision right away **Boating Life**, 2000-11

Newsline, 1997 **States of Entanglement** Sven Anderson, Alan Butler, David Capener, Donal Lally, Clare Lyster, Fiona McDermott, 2021-07-21 Investigates how data production and consumption territorialize the physical landscape filtered through Ireland's role in global communications and as told by the Irish Pavilion at the 2021 Venice Architecture Biennale

features an installation that focuses on the materiality of data infrastructure in space As our everyday lives become increasingly entangled with data technologies the book addresses the utopian fantasy that surrounds the Cloud as transcending physical presence or resourcing By bringing the physical infrastructure around data and its impact on the environment under the spotlight it hopes to reframe how we understand data production and highlight the myth that information technologies are hidden and without major material manifestations on the landscape The context for the book is Ireland which has a significant historical role in the evolution of global communications and data infrastructure In 1866 the world's first transatlantic telegraph cable landed on the West coast of Ireland In 1901 the inventor of the radio Guglielmo Marconi transmitted some of the world's first wireless radio messages from Ireland across the Atlantic Ocean to Newfoundland Today Dublin has overtaken London as the data centre hub of Europe hosting 25% of all available European server space And by the year 2027 data centres are forecast to consume a third of Ireland's total electricity demand The book aims to raise awareness around the hardware of the global internet and Cloud services which is interwoven with the Irish landscape made manifest through the vast constellation of data centres fibre optic cable networks and energy grids that have come to populate its cities and suburbs over recent decades The publication accompanies and supports Entanglement the Irish Pavilion at the 17th Venice Architecture Biennale by archiving the production of the pavilion filtered through a series of poetic excerpts that describe the form components content and furniture that make up the installation At the same time the book is conceived as more than just a catalog by positioning some of the cultural and spatial implications of data technologies in Ireland within a more universal context through contributions by ANNEX the team selected to produce the pavilion as well as invited contributors from the disciplines of Media Theory Journalism Computer Science Geography History and Architecture
