## **Controversies In Minority Voting:**

**Controversies in Minority Voting** Bernard Grofman, Chandler Davidson, 1992 This book discusses how the Fifteenth Amendment and the 1965 Voting Rights Act transformed American politics and looks at the role major civil rights groups have played in lobbying for extensions and amendments in order to insure that its provisions would be enforced *African Americans and the Politics of Congressional Redistricting* Dewey M. Clayton, 2004-11-23 This book provides a detailed analysis of the politics of racial redistricting a topic of particular concern in light of recent federal court cases The book is divided into two parts Part one examines the historical exclusion of blacks from the American political process and the politics behind congressional redistricting The text focuses on partisan manoeuvring and assesses whose interests were being served In particular the book chronicles the legislative action creation of majority black districts in North Carolina and around the South Part two shifts the focus to the myriad of legal battles that ensued as a result of the newly created districts in North Carolina and around the South Majority black districts have been dismantled in the Supreme Court This has been due to the criticism of their arbitrary shape and the notion that race was considered a predominant factor in their design Yet irregularly shaped majority white districts have not been accused of violating districting principles This book purports that blacks were not elected to national office in large numbers prior to the creation of majority black districts indicating the continuing need for race conscious districting as a temporary solution to a complex problem Affirmative Action in Antidiscrimination Law and Policy William M. Leiter, Samuel Leiter, 2011-04-01 Racism sexism and ethnic discrimination have long represented a seemingly intractable problem Affirmative action was conceived as an attack on these ingrained problems but today it is widely misunderstood This volume reviews new developments in affirmative action law policy and ideological conflict in the areas of employment education voting and housing The revised edition adds a discussion of age disability and sexual orientation discrimination providing a truly comprehensive portrait of affirmative action that is informed by history law political science sociology and economics **The South as an American Problem** Larry J. Griffin, Don Harrison Doyle, 1995 In this volume twelve authors take a challenging new look at the South Departing from the issue that has lately preoccupied observers of the South the region's waning cultural distinctiveness the contributors instead look at the dynamics of the region's long troubled relationship with the rest of the nation What they discover allows us all to view the current state and future course of the South as well as its link to the broader culture and polity in a new light To envision the concept of the Problem South and what it means to those within and without the region six historians have joined together with a sociologist an economist two literary scholars a legal scholar and a journalist Their essays which range in subject from the South's climate to its religious fundamentalism to its great outpouring of fiction and autobiography are the products of strong and independent minds that cut across disciplines disagree among themselves blend contemporary and historical insights and confront conventional wisdom and expedient generalities Although consensus among the contributors was never the goal

of this collection some common themes do suggest themselves Above all there is not only a South defined by its geography history and society but also a mythic and metaphoric South one continually refashioned by national regional discourse trends and events In addition the South has long been a mirror in which America has viewed itself The nation has sought time and again to change the region but it has also used the South to expose and modify darker impulses of American culture

**Classifying by Race** Paul E. Peterson, 2014-07-14 The contemporary debate over racial classification has been dominated by fringe voices in American society Cries from the right say history should be abrogated and public policy made color blind while zealots of the left insist that all customs language institutions and practices are racially tinged and that only aggressive color conscious programs can reverse the course of American history The essays in this volume however recognize that racial classification is an issue that cuts too deep and poses too many constitutional questions to be resolved by slogans of either the right or the left The contributors to this volume are James Alt Kenneth Benoit Henry Brady John Bruce Rodolfo O de la Garza Andrew Gelman Lani Guinier Fredrick C Harris Gary King Robert C Lieberman David Ian Lublin David Metz Paul E Peterson Kay Lehman Schlozman Kenneth Shepsle Theda Skocpol Katherine Tate Richard Valelly Sidney Verba and Margaret Weir Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Maximization, Whatever the Cost Maurice T. Cunningham, 2000-10-30 During the early 1990s the Department of Justice used its Voting Rights Act power to object to racially unfair redistricting laws to force states to maximize minority congressional districts The results were dramatic Congressional Black Caucus membership swelled from 25 to 38 and nine new Hispanic congresspersons were sworn in Only three years later the maximization strategy lay in ruins The courts forced many of the new minority districts to be redrawn and the judiciary reserved especially harsh criticism for the Department Cunningham examines and analyzes how the Department came to adopt the maximization strategy He explores the bureaucratic culture of the Division s Voting Section its history and the interaction of its progressive career staff with more conservative political appointees The Division works amidst a vibrant interest group environment with civil rights advocates the state and political parties eager for influence Cunningham shows how that influence contest was won by the civil rights groups how their preferred interpretations of fair redistricting and discriminatory purpose were adopted by the Division and how their chosen districting models were forced upon states by the Division He examines the effect the Department has had on federalism representation and its own impaired credibility with the judiciary Finally he suggests how the Division might resurrect its damaged reputation for balanced enforcement An important study for scholars students and public policy makers involved with civil

rights public administration and public law      **The Appearance of Equality** Christophe M. Burke, 1999-06-30 An examination of the language of law in the area of political representation this book considers the development and recognition of group claims brought pursuant to the Voting Rights Act and the Equal Protection Clause in Supreme Court opinions In his analysis Burke highlights the different discursive strategies broadly identified as liberal and communitarian used by the Supreme Court to justify the outcomes of various cases and he argues that no particular strategy of justification is inherently politically conservative or liberal and that no conception of political representation is unassailable Therefore it is unlikely that the Supreme Court will articulate a stable measure of fair representation The Supreme Court offers one more forum in the deliberation over what is fair representation however it is not likely to provide minority communities with a legal answer to the problem of political underrepresentation As such this book tells the uncertain story of the creation of political fairness by the Supreme Court The language used to characterize what is fair and representative and the theoretical designs which the rhetoric reflects allows us to formulate concepts of fair representation as legal standards evolve By placing the debate over fair representation in not only political and legal but also philosophical terms we are better able to understand the inevitable tensions that drive the concept of representation into new ill defined and contentious areas      **Minority Representation and the Quest for Voting Equality** Bernard Grofman, Lisa Handley, Richard G. Niemi, 1992 With the passage of the Voting Rights Act in 1965 the right of minorities to register and vote was largely secured It was soon discovered however that minority voting did not guarantee the election of minorities or minority preferred candidates Indeed efforts by states and localities in the second half of the 1960s were aimed at denying any substantial minority representation to go along with the ability to cast ballots Eventually congressional amendments to the Act along with the Supreme Court opinion in *Thornburg v Gingles* 1986 have led to efforts to eliminate electoral laws that have the effect of diluting the minority vote whether or not they were enacted with discriminatory intent Controversy still surrounds the matter of minority representation however because of the ambiguity of certain aspects of the law and because of problems in applying it to the largely single member district context of the 1990s This book is the most up to date treatment of voting rights law and the numerous controversies surrounding minority representation The authors have extensive firsthand experience in both the legal battles and the scholarly examination of these issues Based on this wealth of experience they describe the development of the law after 1965 discuss in detail the prevailing Supreme Court interpretation of the Voting Rights Act and examine discrepancies in federal court interpretations of subsequent actions They also introduce the reader to technical procedures for establishing standards of representation and measuring discrimination In the final two chapters they consider the application of voting rights law to districting in the 1990s along with the implications of recent developments for the future of representation in America      Race and Redistricting Tinsley E. Yarbrough, 2002 Through much of the 1990s a newly hatched snake wreaked political havoc in the South When North Carolina gained a seat in Congress following the 1990 census it

sought to rectify a long standing failure to represent African American voters by creating under federal pressure two majority minority voting districts One of these snaked along Interstate 85 for nearly two hundred miles not much wider than the road itself in some places and was ridiculed by many as one of the least compact legislative districts ever proposed From 1993 to 2001 three intertwined cases went before the Supreme Court that decided how far a state could go in establishing voting districts along racial lines Noted Supreme Court biographer Tinsley Yarbrough examines these closely linked landmark cases to show how the Court addressed the constitutionality of redistricting within the volatile contexts of civil rights and partisan politics A suit was first filed by Duke University law professor Robinson Everett a liberal who loathed discrimination but considered racially motivated redistricting a clear violation of the Fourteenth Amendment s equal protection clause Yarbrough tells how Everett enlisted associates as plaintiffs and went on to win two Supreme Court victories in *Shaw v Reno* 1993 and *Shaw v Hunt* 1996 both by 5 4 decisions Following the creation of another flawed redistricting plan he rounded up a new set of plaintiffs to take the battle back to the Supreme Court But this time in *Easley v Cromartie* on the swing vote of Justice Sandra Day O Connor the 5 4 vote went against him Yarbrough shows the significant impact these cases have had on election law and the fascinating interplay of law politics and human conflict that the dispute generated Drawing heavily on court records and on interviews with attorneys on both sides of the litigation he relates a complex and intriguing tale about these protracted struggles His cogent and balanced analysis considers whether the state legislature was wrong in using race as a measure for establishing the new district or whether it was simply engaging in the time honored practice of gerrymandering to ensure political balance *Race and Redistricting* spotlights efforts to racially engineer voting districts in an effort to achieve fair representation By examining one state s efforts to confront such dilemmas it helps readers better understand future disputes over race and politics as well as the ongoing debates over our color blind constitution George Mason University Civil Rights Law Journal ,1997 **United States Supreme Court Reports** United States. Supreme Court,1919 Complete with headnotes summaries of decisions statements of cases points and authorities of counsel annotations tables and parallel references **The Political Research Experience** Marcus E. Ethridge,2002 Organized to complement an introductory course in political science research methods this work aims to help students understand research as it is actually practiced Each chapter opens with an explanation of basic concepts and methods of political research **Michigan Law Review** ,2007 *The Law of Democracy* Samuel Issacharoff,Pamela S. Karlan,Richard H. Pildes,2002 The Law of Democracy offers a systematic exploration of the legal construction of American democracy The book brings together a cluster of issues in law regulating the design of democratic institutions and the book employs a variety of methods historical comparative theoretical doctrinal to explore foundational questions in the theory and practice of democracy Covered issues include the historical development of the individual right to vote current struggles over racial gerrymandering the relationship of the state to political parties the constitutional and policy issues surrounding

campaign finance reform and the tension between majority rule and fair representation of minorities in democratic bodies  
*Symposium* ,2003      *Making Americans* Desmond King,2000-05-15 Specifically the debates in the three decades leading up to 1929 were conceived in terms of desirable versus undesirable immigrants This not only cemented judgements about specific European groups but reinforced prevailing biases against groups already present in the United States particularly African Americans whose inferior status and second class citizenship enshrined in Jim Crow laws and embedded in pseudo scientific arguments about racial classifications appear to have been consolidated in these decades Although the values of different groups have always been recognised in the United States King gives the most thorough account yet of how eugenic arguments were used to establish barriers and to favour an Anglo Saxon conception of American identity rejecting claims of other traditions thus the immigration controversy emerges here as a significant precursor to recent multicultural debates  
Rutgers Law Journal ,1994      **Social Science Working Paper** ,1994      **Republicans and the Black Vote** Michael K. Fauntroy,2008 The Republican Party once enjoyed nearly unanimous support among African American voters today it can hardly maintain a foothold in the black community Exploring how and why this shift occurred as well as recent efforts to reverse it Michael Fauntroy meticulously navigates the policy choices and political strategies that have driven a wedge between the GOP and its formerly stalwart constituents      *UCLA Women's Law Journal* ,1994
