I Never Told Anyone This Before Janice A

Gasker, 2019-07-24 *I Never Told Anyone This Before* is the first book that will enable you to work in an ethical effective manner based on empirically tested guidelines with clients who disclose memories of sexual abuse. You will find that these guidelines result in the creation of a helping environment conducive to the sharing of traumatic recollections. At the same time, this environment is structured to keep you free from legal risk amidst the false memory debate era. With *I Never Told Anyone This Before*, you will overcome your specific concerns for working with special populations such as persons who aren't sure they've been abused, persons who are nonverbal, men, and persons who have suffered head injuries. This book also provides you with a language for discussing sexual abuse memories in a manner that focuses on the client's experiences. You will explore practice techniques that are based on theoretical foundations as well as real helping situations with examples from actual therapy sessions. Other specific areas you will learn about in *I Never Told Anyone This Before* include how to facilitate and manage first-time disclosure of abuse stories, therapeutic use of memories of sexual abuse, the function of memory in identity formation, facilitation of disclosures of traumatic history, avoiding legal risks for therapists in view of the false memory debate, memory as it is treated by psychodynamic, cognitive, and developmental theorists, caveats for researching the disclosure of sexual abuse recollections. Faced with the prospect of working with a possible survivor of childhood sexual abuse, you may be unsure about the therapeutic approach to take. Current controversy highlights the possibility that persons may be harmed rather than helped in the therapeutic process. *I Never Told Anyone This Before* provides you with a combination of theory, research, and practice that will put your anxieties at ease.

Repair work in discourse Sabrina Triml, 2008-01-29 Seminar paper from the year 2000 in the subject English Language and Literature Studies, Linguistics, grade 2.0, University of Vienna, Anglistik und Amerikanistik course, Linguistisches Proseminar, language English. Abstract: Spoken discourse is a process depending on the interaction of at least two participants. They mutually construct this process and understanding is achieved by interaction. But communication is always in danger of breaking down. When people talk to each other, they constantly try to avoid this breakdown by preventing misunderstandings. In writing, one can carefully think about the right words, reconstruct, correct, and rewrite sentences or sections as often as necessary. In spoken discourse, this reconstruction has to happen immediately. Sentences or ideas are not always brought to an end. In order to keep discourse smooth, fluent, and comprehensible, participants need to repair utterances of themselves or others during speaking. It is often the case that someone notices during saying one utterance that they actually want to say something else. So they possibly stop within one sentence and bring in another idea. Thus, repair means interruption and correction of oneself or another person, like that will be forty, no, fifty dollars. In written discourse, such an insertion is often indicated by means of hyphens. Likewise, clarification can happen more explicitly after questions, which signal that the receiver did not understand something and/or asks for further information or a repetition of what was said before. This is often needed when discourse takes place between participants with a different status of knowledge about the topic of their conversation.

All these techniques aim to produce or maintain a process of mutual understanding and keep the conversation going on. When and how people use repair work depends on extra linguistic factors like the topic of the conversation, the kind of discourse and where it takes place, the relationship of the participants, their age and knowledge of the used language. The aim of this paper is to point out that speakers tend to use a higher amount of repair work in informal than in formal discourse. This will be done by analysis of different dialogues within different settings. The hypothesis is that in less formal discourse in an entertaining television programme more clarifying utterances are used than in formal interviews on serious news channels. It is supposed that formal discourse types follow some underlying structures whereas informal ones are unstructured and therefore repairs are more likely to happen.

Self-initiated Repair by Fluent Aphasic Speakers in Conversation Minna Laakso, 1997. People with fluent aphasia have problems both in speaking and in understanding spoken language. Typically their speech is replete with such errors where sounds shift, words blend or in the most severe cases utterances are formed of non-existing words that sound like but are not words of the speaker's language. Furthermore, due to their comprehension disorder, fluent aphasics are generally considered to be unaware of the errors in their speech. Taking this into account, what form do the conversations of these speakers take? Which aphasic features trouble the conversation and how are the problems repaired? Or are they? If fluent aphasics are not aware of their errors, why should they repair anything? This study aims to provide some new insights into fluent aphasia by looking at conversation and at self-repair in particular. The study explores the ways in which fluent aphasics deal with their aphasic speech problems in the presence of other interlocutors in conversation. In this task, the classic description of repair organisation in ordinary conversation is applied to aphasic data. The core of the work is an analysis of self-initiation and the process of repair in the speaking turn of the fluent aphasic speaker as well as an investigation of the interaction between the aphasic and the recipient during such turns. The analysis starts by identifying aphasic word forms that may trouble the interaction and looks at their local conversational context. In particular, the position of different aphasic words in an utterance or a turn is examined with respect to whether they are followed by self-initiation of repair. In addition, the point directly after the initiation of the repair process is inspected for the kind of actions the speaker takes and for the reactions of co-participants during the course of progressing self-repair.

Margaret L. McLaughlin, 1984-03. McLaughlin presents a broad and scholarly survey of conversational organization which will appeal to a broad range of non-specialist readers. The book serves to keep people abreast of the fast-developing literature by providing a glossary of terms, sample conversations, an assessment of what is currently known and guidelines for future research. The author is particularly interested in how the smaller elements in the stream of conversation are combined into a coherent whole. McLaughlin succeeds in identifying the available material, providing an assessment and suggesting directions for future study. Included are a helpful glossary and a very useful bibliography. Advanced undergraduates and graduate students will find it.
