

DISCOURSE ANALYSIS

Discourse analysis is an approach to the study of language that demonstrates how language shapes reality and reveal dominant ways of thinking an acting.

OVERVIEW

Discourse analysis involves the examination of how the 'ways of speaking about things' normalizes and privileges some frames of thinking about things while marginalizing others.

As a simple example, if movies consistently frame the ideal female as passive, silent, and submissive, then this becomes normalized in the "dominant discourse" of gender.

EXAMPLE

Studying Government Policies: A discourse analysis of policy texts would involve looking at the keywords, metaphors, and phrases used in the text and how they reveal ideological frameworks and viewpoints of the government of the day. These sorts of studies often demonstrate how the language of policy texts normalizes some behaviors and marginalizes others.

Conversations From A Conversation Analysis Perspective Eva Kiss, 2004-10-27 Bachelor Thesis from the year 2003 in the subject American Studies Linguistics grade 2.7 B University of Bayreuth Language and Literature Sciences language English abstract Although we converse almost every day we never have exactly the same conversation twice Nevertheless certain parts of conversations occur in forms which are very alike They seem to be constructed according to sets of rules These rules were examined in the 1970 s for the first time The mechanisms which govern our conversations are especially observable in telephone conversations But since the 1970 s new technologies have come up and society changed The aim of this paper is to examine the mechanisms of telephone conversation and how the systems working in telephone conversations have changed since the establishment of the mobile telephone For this the focus on Conversation Analysis as research methodology is explained before coming to the basic features of every conversation Following this telephone conversations are examined according to their structure of opening topic talk and closing Finally the changes of this structure for mobile telephone conversations are pointed out The basis for the observations on mobile telephone conversation is a survey carried out among 20 Canadian citizens and material provided by the participants of the survey Two different main methodologies exist for analysing and examining conversation conversation in general or telephone conversation in special from a linguistic perspective Conversation Analysis and Discourse Analysis To understand my decision to focus on the discipline of Conversation Analysis I will shortly point out the main differences and parallels of these methodologies Of course both disciplines examine conversation But the methods used for this the thereby resulting findings and the main understanding of conversation differ immensely A common aim of Conversation Analysis and Discourse Analysis is to be able to give an account of how coherence and sequential organization is produced and understood Levinson 1983 286 Discourse Analysis uses primitive and basic concepts of linguistics for this It attempts to extend the rules applying to sentences over the boundaries of sentences The main method of the discipline is the isolation of sets of units of discourse followed by a formulation of rules according to these units and finally the division of units into well formed and ill formed sequences
