Empathy Makiko

Kondo, 2017-08-23 Empathy a basic ability for understanding persons holistically building supportive relationships and listening attentively includes being with suffering persons healing and inducing catharsis in them Therefore it is necessary within occupations supporting humans education clinical psychology nursing early childhood care welfare and medicine Conversely there are individual differences in empathy and promoting its development is difficult In this book we use interdisciplinary approaches to empathy for example we discuss a new intervention physical and cross cultural understanding of empathy development of empathy and applications in general and professional education The significance of this book is its evidence based interdisciplinary perspective in understanding empathy

Theater of the Void Teresa Kovacs, 2025-06-15 Theater of the Void explores contemporary German theater in the aftermath of the technology of the atomic bomb Informed by threats of total annihilation whether through nuclear technology or more recently global warming German language theater since the late 1970s encounters the void not as empty space or nothingness but as the possibility of radical transformation Theater of the Void investigates theatrical forms that transform fundamental categories of time space and causality in light of the ontological and epistemological shifts of the nuclear age Teresa Kovacs focuses on four directors and playwrights whose works offer insights into the theater of the void Heiner Müller Elfriede Jelinek Christoph Schlingensiefel and Ren Pollesch Kovacs shows that contemporary German theater has not turned away from the sciences after Hiroshima and Nagasaki but has remained entangled with scientific thinking about quantum physics biology and the environment Investigating these entanglements Theater of the Void finds in the works of these German theater makers a grammar of the void that speaks to the possibilities of a transformed theater in the Anthropocene
