Cooking With Grease:

Do Glaciers Listen? Julie Cruikshank, 2010-10-01 *Do Glaciers Listen* explores the conflicting depictions of glaciers to show how natural and cultural histories are objectively entangled in the Mount Saint Elias ranges. This rugged area where Alaska, British Columbia and the Yukon Territory now meet underwent significant geophysical change in the late eighteenth and nineteenth centuries which coincided with dramatic social upheaval resulting from European exploration and increased travel and trade among Aboriginal peoples. European visitors brought with them varying conceptions of nature as sublime as spiritual or as a resource for human progress. They saw glaciers as inanimate subject to empirical investigation and measurement. Aboriginal oral histories conversely described glaciers as sentient, animate and quick to respond to human behaviour. In each case however the experiences and ideas surrounding glaciers were incorporated into interpretations of social relations. Focusing on these contrasting views during the late stages of the Little Ice Age 1550-1900, Cruikshank demonstrates how local knowledge is produced rather than discovered through colonial encounters and how it often conjoins social and biophysical processes. She then traces how the divergent views weave through contemporary debates about cultural meanings as well as current discussions about protected areas, parks and the new World Heritage site. Readers interested in anthropology and Native and northern studies will find this a fascinating read and a rich addition to circumpolar literature. *The Cook Book of the United States Navy. 1927* United States. Conversations With Landscape Karl Benediktsson, Katrín Anna Lund, 2016-05-13 *Conversations With Landscape* moves beyond the conventional dualisms associated with landscape, exploring notions of landscape and its relation with humans through the metaphor of conversation. Such an approach conceives of landscape as an actor in the ongoing communication that is inherent in any perception, recognising the often ignored mutuality of encounters between human and non-human actors. With contributions drawn from a variety of disciplines including anthropology, geography, archaeology, philosophy, literature and the visual arts, this book explores the affects and emotions engendered in the conversations between landscape and humans. Offering scope for an original and coherent approach to the study of landscape, this book will appeal to scholars and researchers across a range of social sciences and humanities. **Cooking with Grease** Donna Brazile, 2004 An account
