Cooperative Security Reducing Third World Wars:

Cooperative Security I. William Zartman, Viktor Aleksandrovich Kremeniuk, 1995 Examines the roles of the US the Russian coalition and the European Community in establishing new world order and monitoring the relations and boundaries of Third World countries

Peacemaking in International Conflict I. William Zartman, 2007 This updated and expanded edition of the highly popular volume originally published in 1997 describes the tools and skills of peacemaking that are currently available and critically assesses their usefulness and limitations

Coercive Military Strategy Stephen J. Cimbala, 1998 Coercion is persuasion supported by the threat or use of force Just as warfare is often diplomacy carried out by other means coercion the threat of combat or the threat of an escalation in the intensity of combat is a more subtle method of dispute that shades the spectrum between diplomacy and warfare Understanding of coercive military strategy is a prerequisite to the successful making of either policy or war In *Coercive Military Strategy* Stephen J Cimbala shows that coercive military strategy is a necessary part of any diplomatic strategic recipe for success Few wars are total wars fought to annihilation and military power is inherently political employed for political purpose in order to advance the public agenda of a state so in any war there comes a time when a diplomatic resolution may be possible To that end coercive strategy should be flexible for there are as many variations to it as there are variations in wars and warfare Cimbala observes several cases of applying coercive strategy in the twentieth century the U S strategy of limited war during the Cold War the Cuban Missile Crisis in which both the United States and the Soviet Union applied coercive strategy Desert Storm in which the Coalition Forces could practice coercion without restraint and the Vietnam War in which U S coercive strategy was ultimately a failure Additionally Cimbala examines coercion and the theory of collective security which implies a willingness on the part of individual states such as the NATO nations to combine against any aspiring aggressor With his examples and the arguments they illustrate Cimbala shows that although coercive strategy is a remedy for neither the ailments of U S national security nor world conflict it will become more important in peace crisis and even war in the next century when winning with the minimum of force or without force will become more important than winning by means of maximum firepower

Sovereignty as Responsibility Francis M. Deng, Sadikiel Kimaro, Terrence Lyons, 2010-12-01 The authors assert that sovereignty can no longer be seen as a protection against interference but as a charge of responsibility where the state is accountable to both domestic and external constituencies In internal conflicts in Africa sovereign states have often failed to take responsibility for their own citizens welfare and for the humanitarian consequences of conflict leaving the victims with no assistance This book shows how that responsibility can be exercised by states over their own population and by other states in assistance to their fellow sovereigns *Sovereignty as Responsibility* presents a framework

that should guide both national governments and the international community in discharging their respective responsibilities. Broad principles are developed by examining identity as a potential source of conflict, governance as a matter of managing conflict, and economics as a policy field for deterring conflict. Considering conflict management, political stability, economic development, and social welfare as functions of governance, the authors develop strategies, guidelines, and roles for its responsible exercise. Some African governments such as South Africa in the 1990s and Ghana since 1980 have demonstrated impressive gains against these standards, while others such as Rwanda, Somalia, Liberia, Nigeria, and Sudan have failed. Opportunities for making sovereignty more responsible and improving the management of conflicts are examined at the regional and international levels. The lessons from the mixed successes of regional conflict management actions such as the West African intervention in Liberia, the East African mediation in Sudan, and international efforts to urge talks to end the conflict in Angola indicate that friends and neighbors outside the state in conflict have important roles to play in increasing sovereign responsibility. Approaching conflict management from the perspective of the responsibilities of sovereign

International and Regional Security Benjamin Miller, 2016-11-10 This volume is a collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security. The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict and collaboration and the causes of war and peace. More specifically, it explains the sources of intended and unintended great power conflict and collaboration. The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance. Thus, the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world. For example, the book's model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq, the post 2011 Arab Spring, and the conflicts between Russia and Ukraine. The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003. Finally, the book addresses the debate on the future of war and peace in the 21st century. This book will be essential reading for students of international security, regional security, Middle Eastern politics, foreign policy, and IR. **International Conflict**

Management Michael J. Butler, 2009-05-07 This textbook chronicles the logic, evolution, application, and outcomes of the five major approaches to international conflict management. Maritime Order and the Law in East Asia Nong Hong, Gordon

Houlden, 2018-03-22 Many of the maritime disputes today represent a competing interest of two groups: coastal states and user states. This edited volume evaluates the role of the United Nations Convention on the Law of the Sea (UNCLOS) in managing maritime order in East Asia after its ratification in 1994, while reflecting upon various interpretations of UNCLOS. Providing an overview of the key maritime disputes occurring in the Asia Pacific, it examines case studies from a selection of representative countries to consider how these conflicts of interest reflect their respective national interests and the wider

issues that these interpretations have created in relation to navigation regimes maritime entitlement boundary delimitation and dispute settlement

Ecology, Politics and Violent Conflict Mohamed Suliman, 1999 Violent internal conflicts in more and more countries are ruining the lives of millions of people and undermining the ability of their governments to provide security and a tolerable economic existence The contributors to this book take a new view of the reasons for this grave development in Africa the Balkans Central Asia and elsewhere They question traditional analyses of conflict which rely primarily on ethnic religious and cultural explanations since these do not take account of the increasingly obvious link between the growing scarcity of renewable resources and violent conflict in developing countries Shortages of cropland fresh water woodfuel pasture and marine resources cannot be ignored At the same time this book argues that one cannot understand domestic conflicts simply in environmental terms For environmental scarcity functions in a society within a complex matrix of historically derived economic and political situations In particular an unequal social distribution of resources exacerbates scarcity and fuels popular conflict

Climate Change, Security Risks and Conflict Reduction in Africa Charlene Cabot, 2016-11-04 Millions of people are already affected by weather related shocks every year in West Africa and climate change is highly likely to increase these threats In the wake of climate change rising temperatures increasingly irregular rainfall and more frequent natural hazards will endanger the ways of life of vulnerable population groups in this region and destabilize their human security A surge in violence and conflicts could take place One of the conflict constellations could be between farmers and herders These groups are highly vulnerable to climate change due to their dependence on natural resources Millions of people are already affected by weather related shocks every year in West Africa and climate change is highly likely to increase these threats In the wake of climate change rising temperatures increasingly irregular rainfall and more frequent natural hazards will endanger the ways of life of vulnerable population groups in this region and destabilize their human security A surge in violence and conflicts could take place One of the conflict constellations could be between farmers and herders These groups are highly vulnerable to climate change due to their dependence on natural resources for their subsistence Furthermore they are historically prone to enter into conflict over issues of access to natural resources However social economic and political circumstances fundamentally influence environmental conflicts There might thus be opportunities to face the societal challenges of climate change in a peaceful way and the political and institutional framework could play an important role in reducing conflict and violence In order to explore such a path this study analyses the potential of political factors policies and institutions for the reduction of climate change induced or aggravated conflicts between farmers and herders After a theoretical demonstration a case study of agro pastoral conflicts in Burkina Faso Cote d'Ivoire and Ghana is conducted their subsistence Furthermore they are historically prone to enter into conflict over issues of access to natural resources However social economic and political circumstances fundamentally influence environmental conflicts There might thus be opportunities to face the societal challenges of climate
