Willcocks, 2023-08-29 The central concepts of information meaning embodied cognition and semiotics are hugely relevant to contemporary organisations and personal and social lives However these concepts are not well understood and are frequently under represented misrepresented and their importance seriously underplayed in the study of management This is particularly noticeable in the study of the information systems and digital technologies that underpin so much of business operations personal and social life organisation communication and management today This book seeks to fill the obvious gap It provides detailed understanding of fundamental concepts and develops a useable integrative semiotics framework The framework is grounded in rich social theory and philosophy and as the book demonstrates provides a valuable exploratory and explanatory framework for researchers This takes shape as a 12 step research process that has the general features of most research methodologies but also provides distinctive rich resources for in depth research into semiotically related phenomena It will be of great interest to academics undertaking research in digital technologies and business model innovation as well as scholars of research methodology organisation studies HRM marketing and information systems
