## **Control Theories Of Crime And Delinquency Advances In Criminological Theory Hardcover:**

**Control Theories of Crime and Delinquency** Chester L. Britt, Michael R. Gottfredson, 2011-12-31 For the past twenty to thirty years control theories of crime have been at the center of theoretical development in criminology. Key to the control theory perspective is the notion that crime is an inherently individual act and its explanation requires that we focus on the characteristics of individuals who commit crimes. Consequently, control theory focuses on such issues as self control and social control. The contributions to this volume explicate and extend the application of control theory. It is divided into three general areas. Part 1 focuses on key assumptions and components of control theories. Contributors discuss the notion of learning or socialization in the context of control theory and the effects that families, peers, and the criminal justice system have on self control, social ties, and criminal behavior. Part 2 applies control theory to areas typically assumed to be out of the domain of self control theory and social control theory, such as gender differences in crime, domestic violence, and group crime. Considering control theory's emphasis on explaining individual criminal acts, these chapters suggest an interesting area of development by highlighting the possibility that differences in crime across or within groups may begin with individual characteristics and then making inferences about groups and group processes. Part 3 approaches the explanation of crime cross nationally and at the macro level. Although the authors take different approaches, they all illustrate that a theory of crime does not require culture specific elements in order to be a valid cross cultural explanation. Contributors to this volume include Robert Agnew, Todd Armstrong, Leana Allen Bouffard, Augustine Brannigan, Chester Britt, Barbara Costello, Maja Dekovic, Matt DeLisi, Michael Gottfredson, Henriette Haas, Kelly H. Hardwick, Travis Hirschi, Marianne Junger-Tasman, Martin Killias, Helen Mederer, Kevin Thompson, and Alexander Vazsonyi.

**Developmental Theories Of Crime And Delinquency** Terence P. Thornberry, In *Developmental Theories of Crime and Delinquency* Terence P. Thornberry and his contributors show that criminal behavior is not a static human attribute but ebbs and flows over the life course of the individual. Criminal behavior tends to follow a distinct psychological pattern. It is relatively uncommon during childhood, is initiated by most offenders during adolescence, flourishes during late adolescence and early adulthood, and usually diminishes or disappears by the mid twenties. This pattern is not characteristic of all people; some never commit crimes and others become career criminals, but it is a general description of the developmental pattern of criminal offenders. This pattern has profound implications for theories of crime and delinquency. Not only does it explain initiation into, maintenance of, and desistance from involvement in crime, it offers insight into why crime flourishes during adolescence. Traditional theories of crime and delinquency have often failed to distinguish among different phases of criminal careers. They tend to ignore developmental changes that occur across a person's life course, changes that coincide with and can explain the causes and patterns of criminal behavior. This paperback edition of the seventh volume of the distinguished series *Advances in Criminological Theory* moves us from static identifications of the criminal by presenting a broad range of developmental explanations of

crime Each contributor articulates a developmental or life course perspective in explaining how people become involved in delinquency and crime Each covers a wide range of theoretical territory and reveals how a developmental perspective enhances the explanatory power of traditional theories of crime and delinquency This volume is an invaluable tool for criminologists sociologists psychologists and other professionals seeking to teach how crime and violence can be understood in our culture

*Fifty Years of Causes of Delinquency, Volume 25* James C. Oleson, Barbara J. Costello, 2019-11-19 This volume marks the 50th anniversary of the publication of Travis Hirschi's seminal work *Causes of Delinquency* The influence of Hirschi's book and the theory of social control it described can scarcely be overstated Social control theory has been empirically tested or commented on by hundreds of scholars and is generally regarded as one of the three dominant theories of crime The current work highlights the impact that social control theory has had on criminological theory and research to date Agnew's contribution highlights the role that Hirschi's tests of control versus strain theory had in contributing to the near demise of classic strain theories and to the subsequent development of general strain theory Serrano Maillo relates control to drift and Todor and Hope compare the human nature assumptions of control theory to the current psychological literature Other contributions return to Hirschi's original Richmond Youth Survey RYS data and demonstrate the robustness of Hirschi's major findings Costello

and Anderson find strong support for Hirschi's predictions in an analysis of a diverse group of youths in Fayetteville Arkansas in 1999 Nofziger similarly finds support for Hirschi's predictions with an analysis of the girls in the RYS and explores the criticisms of social control theory that were the result of Hirschi's failure to analyze the data from the girls in the sample Kempf Leonard revisits her seminal 1993 survey of control theory and reviews the current empirical status of control theory Other contributions explore new directions for both social control theory and self control theory The contribution by Cullen Lee and Butler holds that one element of the social bond commitment was under theorized by Hirschi and the authors present a more in depth development of the concept Quist explores the possibility of expanding social control theory to explicitly incorporate exchange theory concepts Ueda and Tsutomi apply control theory cross culturally to a sample of Japanese students and Felson uses control theory to organize criminological ideas Vazsonyi and Javakhishvili's contribution is an empirical analysis of the connections between social control in early childhood and self control later in life Chapple and McQuillan's contribution suggests that the gender gap in delinquency is better explained by increased controls in girls than by gendered pathways to offending Oleson traces the evolution of Hirschi's control theory and suggests that given the relationships between fact and theory a biosocial model of control might be a promising line of inquiry Fifty Years of Causes of Delinquency The Criminology of Travis Hirschi describes the current state of control theory and suggests its future directions as well as demonstrates its enduring importance for criminological theory and research The volume will be of interest to scholars working in the control theory tradition as well as those critical of the perspective and is suitable for use in graduate courses in criminological theory

**Social Control and Self-Control Theories of Crime and Deviance**

L. Edward Wells, 2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi's seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency

**Social Learning Theory and the Explanation of Crime**

Ronald L. Akers, Gary F. Jensen, 2011-12-31 Social learning theory has been called the dominant theory of crime and delinquency in the United States yet it is often misrepresented This latest volume in the distinguished Advances in Criminological Theory series explores the impact of this theory Some equate it with differential association theory Others depict it as little more than a micro level appendage to cultural deviance theories There have been earlier attempts to clarify

the theory's unique features in comparison to other theories and others have applied it to broader issues. These efforts are extended in this volume which focuses on developing, applying and testing the theory on a variety of criminal and delinquent behavior. It applies the theory to treatment and prevention, moving social learning into a global context for the twenty-first century. This comprehensive volume includes the latest work, tests and theoretical advances in social learning theory and will be particularly helpful to criminologists, sociologists and psychologists. It may also be of interest to those concerned with current issues relating to delinquency, drug use, abuse and drinking alcohol abuse. Taking Stock Francis T.

Cullen, 2017-07-05 Criminology is in a period of much theoretical ferment. Older theories have been revitalized and newer theories have been set forth. The very richness of our thinking about crime, however, leads to questions about the relative merits of these competing paradigms. Accordingly, in this volume, advocates of prominent theories are asked to take stock of their perspectives. Their challenge is to assess the empirical status of their theory and to map out future directions for theoretical development. **Social Learning and Social Structure** Ronald L. Akers, 2011-12-31 The social learning theory of crime integrates Edwin H. Sutherland's differential association theory with behavioral learning theory. It is a widely accepted and applied approach to criminal and deviant behavior. However, it is also widely misinterpreted, misstated and misapplied. This is the first single volume in depth, authoritative discussion of the background, concepts, development, modifications and empirical tests of social learning theory. Akers begins with a personal account of Sutherland's involvement in criminology and the origins of his influential perspective. He then traces the intellectual history of Sutherland's theory as well as social learning theory, providing a comprehensive explanation of how each theory approaches illegal behavior. Akers reviews research on various correlates and predictors of crime and delinquency that may be used as operational measures of differential association, reinforcement and other social learning concepts. Akers proposes a new integrated theory of social learning and social structure that links group differences in crime to individual conduct. He concludes with a cogent discussion of the implications of social learning theory for criminology and public policy. Now available in paperback with a new introduction by the author, this volume will be invaluable to professionals and for use in courses in criminology and deviance. **Integrated Developmental and Life-Course Theories of Offending** David P. Farrington, 2011-12-31

Developmental and life course criminology aims to provide information about how offending and antisocial behavior develops, about risk and protective factors at different ages and about the effects of life events on the course of development. This volume advances knowledge about these theories of offender behavior, many of which have been formulated only in the last twenty years. It also integrates knowledge about individual, family, peer, school, neighborhood, community and situational influences on offender behavior and combines key elements of earlier theories such as strain, social learning, differential association and control theory. Contributors Benjamin B. Lahey and Irwin D. Waldman focus on antisocial propensity and the importance of biological and individual factors. Alex R. Piquero and Terrie E. Moffitt distinguish between life course persistent

and adolescent limited offenders David P Farrington presents the Integrated Cognitive Antisocial Potential ICAP theory which distinguishes between long term and short term influences on antisocial potential Richard F Catalano J David Hawkins and their colleagues test the Social Development Model SDM Marc Le Blanc proposes an integrated multi layered control theory in which criminal behavior depends on bonding to society psychological development modeling and constraints Robert J Sampson and John H Laub hypothesize that offending is inhibited by the strength of bonding to family peers schools and later adult social institutions such as marriage and jobs Terence P Thornberry and Marvin D Krohn propose an interactional theory of antisocial behavior Per Olof H Witkstr m s developmental ecological action theory emphasizes the importance of situational factors opportunities cause temptation friction produces provocation and monitoring and the risk of sanctions have deterrent effects

**Advances in Criminological Theory** William S. Laufer, Freda Adler, 2017-11-30 Criminology has developed strong methodological tools over the past decades establishing itself as a competitive and sophisticated social science Despite and perhaps because of its emphasis on matters of design methodology and quantitative analysis criminology has had few significant advances in theory Advances in Criminological Theory is the first publication exclusively dedicated to the dissemination of original work on criminological theory It was created to overcome the neglect of theory construction and validation in existing criminological publications as well as to further the free exchange of ideas propositions and postulates This first volume of the series meets this challenge

**Challenging Criminological Theory** Francis T. Cullen, Pamela Wilcox, Robert J. Sampson, Brendan D. Dooley, 2017-07-12 This volume is divided into five sections that when taken together offer an informative account of the impact of Ruth Rosner Kornhauser s Social Sources of Delinquency on the development of American criminological thought This classic book was her major contribution to the field Section I tells the story of Kornhauser s brief but influential academic career Section II probes deeply into the specific ways in which she challenged criminological theory and the subsequent responses that were forthcoming Section III then presents commentary on specific lines of inquiry inspired by Kornhauser s book and orientation to criminological theory Section IV explores recent efforts to move beyond Kornhauser s insights on communities and crime Section V concludes with three critical essays contending that Social Sources of Delinquency paid insufficient attention to criminal motivation the role of opportunity in offending and gangs and girls This volume authored by prominent scholars shows that Kornhauser s way of thinking about crime continues to be a starting point for much criminological theory today

**Race and Criminal Justice** Michael J. Lynch, 1991 *The American System of Criminal Justice* George F. Cole, Christopher E. Smith, 2004 This classic

best seller commonly referred to as *The Eagle* encourages students to become better citizens to determine what Justice means in our society and what role individuals play. This text examines criminal justice as an interdisciplinary endeavor sharing elements from criminology, sociology, law, history, psychology, and political science. It challenges students to balance the mechanics and system of criminal justice with the human side of the story. Cole and Smith present an exciting and relevant introduction to the field of criminal justice. The text combines solid research and intellectual rigor in an approachable manner with detailed attention to current and compelling events to help students appreciate the many aspects of the discipline and how they can participate in the system as citizens of the United States.

***New Directions in Criminological Theory*** Freda Adler, William S. Laufer, 2023-04-28 *New Directions in Criminological Theory* focuses on new approaches to theory construction with particular emphasis on reformulations and new applications of existing paradigms. It includes an assessment of labeling theory demonstrating how the approach could become part of a more comprehensive explanation of crime. A case is made for studying crime in terms of the social context in which crimes are conceived, interpreted, and negotiated. The debate between crime general and crime specific approaches is further amplified. A rethinking of Hirschi's control theory is presented. The volume includes theoretical discussions of spouse abuse, of punishment, and of power control models. Additional chapters examine theoretical advances in corporate illegality, employee theft, and the alcohol crime syndrome. These original contributions include Charles F. Wellford and Ruth A. Triplett, *The Future of Labeling Theory*; Austin T. Turk, *A Proposed Resolution of Key Issues in the Political Sociology of Law*; David Weisburd and Lisa Maher, *Contrasting Crime General and Crime Specific Theory*; Sally Simpson, *Strategy, Structure, and Corporate Crime*; Edward W. Sieh, *Employee Theft*; Robert Nash Parker, *Alcohol and Theories of Homicide*; Kimberly L. Kempf, *The Empirical Status of Hirschi's Control Theory*; Jeffrey Fagan, *The Social Control of Spouse Assault*; Marc Le Blanc and Aaron Caplan, *Theoretical Formalization: A Necessity*; Michael J. Lynch, *Control Theory and Punishment*; Gary F. Jensen, *Power Control vs. Social Control Theories of Common Delinquency*; John Hagan, A. R. Gillis, and John Simpson, *The Power of Control in Sociological Theories of Delinquency*.

***Advances in Criminological Theory*** Freda Adler, William S. Laufer, 1989 SNI National Criminal Justice Reference Service (U.S.), 1979 *Criminological Theories* Ronald L. Akers, 2013-07-04 In *Criminological Theories*, the noted criminologist Ronald Akers provides thorough description, discussion, and appraisal of the leading theories of crime, delinquent behavior, and law. Criminal justice: the origin and history of each theory and its contemporary developments and adherents. Akers offers a clear explanation of each theory, the central concepts and hypotheses of each theory, as well as critical criteria for evaluating each theory in terms of its empirical validity. Researchers and librarians, as well as general readers, will find this book a very useful tool and will applaud its clear and understandable exposition of abstract concepts.

***Beyond Empiricism*** Joan McCord, 2017-10-19 *Beyond Empiricism* expands the discourse on theories of criminal behavior. It considers institutional, social, and individual issues related to criminal behavior while

individually each raises questions about the adequacy of current theoretical claims. The topics have significant implications both for policy and research in criminology. Per Olof Wikström introduces a cross level action theory of crime. He suggests that better understanding of causal mechanisms can lead to a situational theory of action based on perception of alternatives and the process of choice. David Wolcott and Steven Schlossman provide new perspectives on the issues of racial disparity and the incarceration of adolescents in adult prisons. These authors highlight gaps in our understanding of early twentieth century juvenile justice and negate some popular claims about recent changes in the criminal law. Peter Grabosky spotlights privatization policies in the criminal justice system suggesting a framework for analyzing the balance of advantage resulting from three basic forms of institutional relationships in policing. Steven Messner and Richard Rosenfeld discuss why institutional analysis has been seriously underdeveloped in etiological analyses of crime. Jordan Pederson and Matthew Shane scrutinize the concept of aggression. Their descriptions of aggressive behavior among non human animals provide a fascinating backdrop for understanding human actions. Joan McCord emphasizes the intentionality of crimes as she argues that to understand what causes crime one must have a theory about what it means to act intentionally. After critically appraising prior theories, McCord introduces and defends a new theory of motivation based on a post empiricist theory of language. This latest volume in the distinguished *Advances in Criminological Theory* series continues to add to the theoretical underpinnings of the field and will be important to all collections of social science research on criminology.
