Controlled Interphases in Composite Materials Hatsuo Ishida, 2012-12-06 The third International Conference on Composite Interfaces ICCI III was held under the auspices of ASM International The Aluminum Company of America Alcoa The Edison Polymer Innovation Co EPIC Case Western Reserve University Nippon Glass Fiber Co Nitto Boseki Co Office of Naval Research ONR SAMPE Japan Teijin Co Mobay Co Union Carbide Co and Vetrotex Sain Gobain The underlying philosophy of the conference continues to be the promotion of fundamental understanding of the structure and role of composite interfaces With the growth of composite interface studies the research direction naturally changes from characterization and understanding of interfacial structure to controlling this structure For this reason the conference was subtitled Controlled Interphase Structure The rather unfamiliar phrase interphase is used to emphasize the interfacial region whose properties are different from the bulk The importance of the interphase to the mechanochemical properties has been rapidly recognized among composite researchers in recent years The conference incorporated nine sessions No concurrent sessions were planned because of the strong interest among participants and organizers to attract researchers from different disciplines Papers presented were redistributed in Parts I through V Because of this both the conference and proceedings are not organized based on the traditional disciplines or materials but rather around concepts

Composite Materials IV Chi Y. A. Tsao, Jingkun Guo, 2006 Composite materials have been at the center of research and development in the materials community for decades The concept of combining metals ceramics and polymers of various types shapes and properties into a single composite material having properties that none of the constituents can themselves exhibit has provided endless

scope for human beings to invent It has therefore stimulated numerous research and development efforts and many applications However in spite of the advantages of composite materials many underlying problems arising from the complexity of the systems have greatly hindered them from being the major players that they should be in our daily lives Needless to say the challenges presented to the composite materials community have been the driving force for organizing composite materials conferences including the Cross Strait ones

Polypropylene Structure, Blends and Composites J. Karger-Kocsis,1995 Although polypropylene has been marketed since the 1950s research and development in this area is still vigorous The consumption of polypropylene over the years has been relatively high mainly due to the steady improvement of its property profile Polypropylene Structures Blends and Composites in three separate volumes reflects on the key factors which have contributed to the success of polypropylene dealing with all aspects of structure performance relationships relevant to thermoplastic polymers and related composites Volume 1 Structure and Morphology deals with polymorphism in polypropylene homo and copolymers where molecular and supermolecular structures are covered and the processing induced structure development of polypropylene showing the interrelation between the processing induced morphology and mechanical performance Volume 2 Copolymers and Blends contains comprehensive surveys of the nucleation and crystallisation behaviour of the related systems It includes the development of morphology and its effects on rheological and mechanical properties of polypropylene based alloys and blends and a review of polypropylene based thermoplastic elastomers Volume 3 Composites gives a comprehensive overview of filled and reinforced systems with polypropylene as a matrix material with the main emphasis on processing structure property interrelationships Chapters cover all aspects of particulate filled chopped fibre fibre mat and continuous fibre reinforced composites Interfacial phenomena such as adhesion wetting and interfacial crystallisation are also included as important aspects of this subject
