Noshpitz, 1997 Renowned authorities in their respective fields present the most up to date coverage of all that is known regarding child and adolescent psychiatry Presented developmentally prominent contributors have produced a body of knowledge that describes what children are what they need what hurts and helps them Volume 1 deals with infants and preschoolers Volume 2 with grade school

children Volume 3 deals with adolescence and Volume 4 with varieties of development Volume 5 contains information on assessing diagnosing and treatment planning for the range of psychiatric and psychologic problems children and adolescents may experience during their development Volume 6 introduces the basic science of child and adolescent psychiatry and presents a myriad of treatment options available to psychiatrists Volume 7 contains an overview of the history of the field of child psychiatry and examines contemporary issues facing child and adolescent psychiatrists

Adolescent Anger Control Eva L. Feindler,Randolph B. Ecton,1986 The Adolescent Anger Control Program described in this guidebook is modeled after the important work of Ray Novaco and Don Meichenbaum They have developed a stress inoculation or coping skills approach which incorporates a number of cognitive behavioral techniques for arousal reduction and cognitive restructuring We have blended these techniques with various self control strategies known to be effective with children and adolescents in particular self monitoring self evaluation and self reinforcement to facilitate the control of anger and aggression Finally we have included several social skills and assertion components as well as the training techniques of modeling and behavior rehearsal we are indebted to Arnie Goldstein his colleagues and their Skill streaming approach

Strategies for Controlling Adolescent Drug Use J. Michael Polich,1984 The purpose of this study is to evaluate the available evidence on the effectiveness of drug control measures and to recommend the most promising areas for future private and public programs to reduce the use of drugs by young people Illicit drug use is widespread among both adolescents and adults Programs to control it have employed three principal methods 1 enforcement of drug laws 2 treatment of chronic abusers and 3 prevention of initial drug use The authors find that while intensified law enforcement is not likely to reduce adolescent drug use and the benefits of expanded treatment remain uncertain prevention programs hold more promise The most encouraging evidence comes from the success of school based programs to prevent cigarette smoking which offer a strategy that may be adaptable to other drugs
