- A major area of study in the analysis of discourse is conversation analysis. Conversation analysis looks at ordinary everyday spoken discourse and aims to understand, from a fine grained analysis of the conversation, how people manage their interactions. It also looks at how social relations are developed through the use of spoken discourse. This chapter discusses the principles underlying conversation analysis. The chapter gives examples of the kinds of conversational strategies speakers use as well as providing examples of these in a number of different kinds of conversational interactions.

addition to the sociolinguistics canon *Conversation* T. Givón, 1997-05-07 The papers in this volume were originally presented at the Symposium on Conversation held at the University of New Mexico in July 1995 The symposium brought together scholars who work on face to face communication from a variety of perspectives social cultural cognitive and communicative Our aim for both the symposium and this volume has been to challenge some of the prevailing dichotomies in discourse studies First the cleavage between the study of information flow and the study of social interaction Second the theoretical division between speech situation models and cognitive models Third the methodological split between the study of spontaneous conversation in natural context and the study of speech production and comprehension under controlled experimental conditions And fourth the rigid genre distinction between narrative and conversational discourse All four dichotomies have been useful either methodologically or historically But important as they may have been in the past the time has perhaps come to work toward an integrated approach to the study of human communication one that will be less dependent on narrow reductions Both the ontological primacy and the methodological challenge of natural face to face communication are self evident Human language has evolved is acquired and is practiced most commonly in the context of face to face communication Most past theory building in either linguistics or psychology has not benefited from the study of face to face communication a fact that is regrettable and demands rectification We hope that this volume tilts in the right direction Doing Conversation, Discourse and Document Analysis Tim Rapley, 2011-09-09 Introducing the theory and practice of conversation discourse and document analysis this text demonstrates the usefulness of these methods in addressing key questions in the social sciences Tim Rapley also provides an overview of the particular challenges involved in collecting and analysing data from these sources
