Convict Workers Reinterpreting Australia's Past:

Convict Workers Stephen Nicholas, 1988 This work offers a new interpretation of Australia's convict past. It is based on a detailed analysis of records of 20,000 male and female convicts, one in three of those transported to New South Wales between 1817 and 1840. Holding the Line David H. Plowman, 1989-07-13 Employer organisations have had greater difficulties than trade unions in creating top level representation as this 1989 volume shows. Within Australia, national coordination of employers in fact predates the Australian Council of Trade Unions by over two decades and provides a story of growth and development of interest to those involved in the changing face of industrial relations. This book examines the coordinating bodies that were established by the middle sized and larger employers including the Confederation of Australian Industry. It considers the difficulties which these coordinating bodies have faced. It also examines the symbiotic relationship that existed between Australian employers' associations and the arbitration systems which have played such an important role in regulating the industrial relations of Australia. Dr Plowman's study thus illuminates the unique Australian arbitration and labour relations system with fresh insights and perspectives. **Convict Maids** Deborah Oxley, 1996-06-17 This analysis of female transports to Australia reveals their significant contribution to the new economy. *Life Courses of Young Convicts Transported to Van Diemen's Land* Emma D. Watkins, 2020-02-06 Drawing on digital criminal records, this book traces the life courses of young convicts who were sentenced at the Old Bailey and transported to Van Diemen's Land in the early 19th century. It explores the everyday lives of the convicts pre and post transportation, focusing on their crimes, punishments, education, employment and family life right up to their deaths. Emma D. Watkins contextualizes these young convicts within the punishment system, economy and culture that they were thrust into by their forced movement to Australia. This allows an understanding of the factors which determined their chances of achieving a settled life away from crime in the colony. Packed with case studies offering vivid accounts of the offenders' lives, *Life Courses of Young Convicts Transported to Van Diemen's Land* makes an important contribution to the history of transportation, social history and Australian history.

Transforming the Colony Sean Winter, 2017-08-21 Between 1850 and 1868 approximately 10,000 British convicts were transported to Western Australia in one of the final phases of global penal transportation. The arrival of these men utterly transformed the small Swan River Colony, bringing capital, labour, population influx and contact with the outside world. Yet their contribution has been downplayed in Western Australian history, outweighed by a sense of shame that the first free Australian colony requested voluntary conversion to penal status in order to survive. This book, based on the author's PhD research in archaeology, investigates the lives of convicts transported to Western Australia and, in particular, how their presence in the colony served as a form of modernity, fundamentally transforming it in the process. It focuses on the use of the administrative category of the ticket of leave to allow convict labour to be used throughout the colony. As such, the text examines the impact of the convict system on regional areas of Western Australia, concentrating on the Eastern District.

communities of Guildford Toodyay and York and the convicts who worked there Using archaeological data from three convict depots supported by a range of other data sources such as historical documents genealogical information and oral histories the nature of convict life in the regions is teased out In the process the unique nature of the Western Australian penal colony is demonstrated and the contribution of convicts to the history of the state explored **APAIS 1992: Australian public affairs information service** , **Australian Labour History** Greg Patmore,1991 **Australian Economic History** Claire E. F. Wright,2022-06-02 In a time of pandemics war and climate change fostering knowledge that transcends disciplinary boundaries is more important than ever Economic history is one of the world s oldest interdisciplinary fields with its prosperity dependent on connection and relevance to disciplinary behemoths economics and history Australian Economic History is the first history of an interdisciplinary field in Australia and the first to set the field s progress within the structures of Australian universities It highlights the lived experience of doing interdisciplinary research and how scholars have navigated the opportunities and challenges of this form of knowledge These lessons are vital for those seeking to develop robust interdisciplinary conversations now and in the future This previously untold story of economic history in Australia exposes the centrality of economic thought and scholarship to Australian intellectual and political life Deftly positioning economic history in an innovative institutional place based and person focused narrative Claire Wright entangles economics with the history of education to produce a tale of university interdisciplinarity influence and impact Written with vitality and bursting with both data and anecdote this book makes an exceptional contribution to the intersecting fields of history economics and higher education studies Hannah Forsyth author of A History of the Modern Australian University Few readers would expect to find a classical tragedy in the story of an academic field Yet that is what Claire Wright shows us in this study of Economic History as it has been practiced in Australia She traces the field from legendary beginnings to triumphant growth to organisational collapse and renaissance on other terms Carefully researched and vigorously written this book raises questions about disciplines and interdisciplinary fields universities and markets and social bases of intellectual work that are relevant to all fields today Raewyn Connell author of The Good University Australia proved a pioneer in the study of economic history nurturing a discipline with innovative data and understanding of material trends Yet by the 1990s economic history departments closed as senior scholars retired and the field was subsumed by conventional economics In this absorbing study Dr Claire Wright challenges the conventional account She is tough minded about financial and institutional pressures on the field but cautiously optimistic about the future It is a mistake she argues to see institutional representation as the benchmark of influence Instead the interdisciplinary nature of economic history has encouraged new research and teaching across the humanities and social sciences With close attention to individual scholars and their university departments and a deep sense of the trajectory of the field Australian Economic History Transformations of an Interdisciplinary Field is an original and important contribution to Australian intellectual history Glyn Davis
