Cooperative Information Systems Trends And Directions:

Cooperative Information Systems M. P. Papazoglou, G. Schlageter, 1998 Cooperative Information Systems Trends and Directions contains chapters from international experts in the field on all aspects of cooperative information systems It covers theory practice implementation security and other important issues Covers all aspects of cooperative information systems Contains chapters from international experts in the field Presents theory practice implementation security and other important issues

On The Move to Meaningful Internet Systems 2003: CoopIS, DOA, and ODBASE Zahir Tari, Douglas C. Schmidt, 2003-10-25 missions in fact also treat an envisaged mutual impact among them As for the 2002 edition in Irvine the organizers wanted to stimulate this cross pollination with a program of shared famous keynote speakers this year we got Sycara, Soley and Mylopoulos and encouraged multiple attendance by providing authors with free access to another conference or workshop of their choice We received an even larger number of submissions than last year for the three conferences 360 in total and the workshops 170 in total Not only can we therefore again claim a measurable success in attracting a representative volume of scientific papers but such a harvest allowed the program committees of course to compose a high quality cross section of worldwide research in the areas covered In spite of the increased number of submissions the Program Chairs of the three main conferences decided to accept only approximately the same number of papers for presentation and publication as in 2002 i.e. around 1 paper out of every 4-5 submitted For the workshops the acceptance rate was about 1 in 2 Also for this reason we decided to separate the proceedings into two volumes with their own titles and we are grateful to Springer Verlag for their collaboration in producing these two books The reviewing process by the respective program committees was very professional and each paper in the main conferences was reviewed by at least three referees

Business Process Management Wil van der Aalst, Arthur ter Hofstede, Mathias Weske, 2003-08-03 The refereed proceedings of the International Conference on Business Process Management BPM 2003 held in Eindhoven The Netherlands in June 2003 The 25 revised full papers presented together with an introductory survey article were carefully reviewed and selected from 77 submissions Among the issues addressed are Web services workflow modeling business process modeling collaborative computing computer supported collaborative work workflow patterns business process engineering business process patterns workflow systems Petri nets process services business process reengineering and business process management tools

Web Services, E-Business, and the Semantic Web Christoph Bussler, Richard Hull, Sheila A. McIlraith, Maria E. Orlowska, Barbara Pernici, Jian Yang, 2002-11-27 This book constitutes the thoroughly refereed post proceedings of the International Workshop on Web Services E Business and the Semantic Web WES 2002 held in Toronto Canada in May 2002 in conjunction with CAiSE 2002 The 18 revised full papers presented together with two keynote papers were carefully selected and improved during two rounds of reviewing and revision The papers are organized in topical sections on web services e business and e services and the semantic web

Data Quality Carlo

Batini, Monica Scannapieco, 2006-09-27 Poor data quality can seriously hinder or damage the efficiency and effectiveness of organizations and businesses The growing awareness of such repercussions has led to major public initiatives like the Data Quality Act in the USA and the European 2003 98 directive of the European Parliament Batini and Scannapieco present a comprehensive and systematic introduction to the wide set of issues related to data quality They start with a detailed description of different data quality dimensions like accuracy completeness and consistency and their importance in different types of data like federated data web data or time dependent data and in different data categories classified according to frequency of change like stable long term and frequently changing data The book's extensive description of techniques and methodologies from core data quality research as well as from related fields like data mining probability theory statistical data analysis and machine learning gives an excellent overview of the current state of the art The presentation is completed by a short description and critical comparison of tools and practical methodologies which will help readers to resolve their own quality problems This book is an ideal combination of the soundness of theoretical foundations and the applicability of practical approaches It is ideally suited for everyone researchers students or professionals interested in a comprehensive overview of data quality issues In addition it will serve as the basis for an introductory course or for self study on this topic
