Deterrence Theory And Chinese Behavior:

Deterrence Theory and Chinese Behavior Abram N. Shulsky, 2000 China's recent reforms have led to unprecedented economic growth. If this continues, China will be able to turn its great potential power into actual power. The result could be in the very long term the rise of China as a rival to the United States as the world's predominant power. In the nearer term, China could become a significant rival in the East Asian region. In this context, the issue for U.S. policy is how to handle a rising power, a problem that predominant powers have faced many times throughout history. It is the contention of this report that the future Sino-U.S. context will illustrate many of the problems of deterrence theory that have been discussed in recent decades. Deterrence theory will be in general more difficult to apply than it was in the U.S.-Soviet Cold War context. The key may be to seek nonmilitary means of deterrence, i.e., diplomatic ways to manipulate the tension to China's disadvantage.

Chinese National Security Decisionmaking Under Stress Andrew Scobell, 2005 If there is one constant in expert analyses of the history of modern China, it is the characterization of a country perpetually in the throes of crises. While China at the midpoint of the Twenty-first Century's first decade is arguably the most secure and stable it has been in more than a century, crises continue to emerge with apparent frequency. Consequently, the study of China's behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world. Cyberdeterrence and Cyberwar Martin C. Libicki, 2009-09-22 Cyberspace, where information and hence serious value is stored and manipulated, is a tempting target. An attacker could be a person, group, or state and may disrupt or corrupt the systems from which cyberspace is built. When states are involved, it is tempting to compare fights to warfare, but there are important differences. The author addresses these differences and ways the United States protect itself in the face of attack. Assessing the Threat: The Chinese Military and Taiwan's Security, Since at least the early 1950s, the entire Asia-Pacific region has struggled with the complicated and complex relationship between China and Taiwan. Today, the Taiwan question is considered a potential flashpoint for a much larger international conflict. Bringing together experts from the United States and Taiwan, Assessing the Threat provides a comprehensive look at the dangers of military escalation in the Taiwan Strait, the latest advances in capabilities of the People's Liberation Army, and China's security relationship with the United States and the Asia-Pacific. There is increasing concern that Beijing is steadily shifting the balance of power across the Taiwan Strait in its favor. Recent advances in Chinese air and naval power, along with changes in PLA doctrine, have the potential to weaken deterrence and destabilize the cross-strait military balance. At this critical juncture, there is no question that this issue requires sustained, detailed analysis and that many measures can and should be taken to reduce the threat of conflict between China, Taiwan, and the United States. Assessing the threat offers such analysis as well as concrete suggestions and crisis management practices for government and military leaders in Washington, D.C., Beijing, and Taipei. **The Rise of China** Gary Schmitt, 2009-05-26 Although the United States is rightly preoccupied with the threat of Islamist terrorism and the two conflicts in Iraq and

Afghanistan there is a wide consensus among American strategic thinkers that America's greatest challenge over the next decades will be the rise of China. With its expanding economy and formidable military growth, China is positioning itself to challenge the United States as the greatest international power on the world stage. *The Rise of China* is a collection of essays about the nature of that threat and what the U.S. and its allies might do in the areas of foreign and defense affairs to meet it. Contributing authors: Michael R. Auslin, Dan Blumenthal, Ellen Bork, Nicholas Eberstadt, Robert Kagan, Gary J. Schmitt, and Ashley J. Tellis. They contemplate how these two rising ambitious powers are contesting for leadership in East Asia and ask if the sanguine forecasts for a peaceful century will hold true. Although the Chinese have been very careful to look like a cautious power and in key respects have been they see the international scene as fundamentally one of antagonism. And this is unlikely to change until and unless the regime changes. It is this China the authors of *The Rise of China* assert that we will be dealing with for some time to come.

The papers included in this volume comprise research from participants in the 2019 Nuclear Scholars Initiative. These papers explore a variety of topics such as the future of arms control treaties, the role of artificial intelligence and cyber resilience in nuclear security, and the role of regional dynamics in nuclear security.

Chinese Environmental Governance Bingqiang Ren, 2013-12-05. In this edited volume, leading environmental policy experts from China, USA, and Europe provide a contemporary view of Chinese environmental policy, analyzing current discussions among various actors and agencies. The book covers a wide range of topics, including the gap between national policy goals and their local implementation, cultural and social factors shaping political behavior, legal and political systems affecting environmental policy creation and execution, new societal forces participating in environmental policymaking and governance, and local state strategies tasked with navigating a mix of political, legal, and societal forces. Featuring in-depth empirically grounded analyses with interdisciplinary approaches, the book is ideal reading for scholars interested in the complex nature of balancing Chinese environmental sustainability and economic growth.

Chinese National Security Andrew Scobell, Larry M. Wortzel, 2005. This volume represents the fruits of a conference held at the U.S. Army War College in September 2005 on the theme of Chinese Crisis Management. One of the major debates that emerged among participants was whether all the case studies under examination constituted crises in the eyes of China's leaders. The consensus was that not all of those incidents were perceived as crises. As a result, the rubric of decision making under stress was adopted as presenters revised their papers for publication.
