

## Early Childhood Review: Numbers

### How to assess the child

The assessment is to review the child's numerical number recognition. The teacher points to the letter and the child says the number. The teacher can place a tick at the numbers that the child says correctly.

### Remember:

Children do get nervous when doing assessments. Try to ease them by using encouraging words and reassure them. If a child is finding something challenging, give them time to do it, or move on to something else and come back to it. Give the child breaks between the tasks, so they can get overwhelmed.

Try not to tell the children that they are doing an assessment. The goal is to learn and measure.

Ensure that assessments are properly stored in teacher files or assessment files and that unauthorized persons do not view them.
