Developing Minds:

Developing Minds Michael Rutter, Marjorie Rutter, 1993-06-16 Most models of human development end abruptly with adolescence But according to the internationally renowned theorist and researcher Michael Rutter we continue to mature throughout our life span In this volume Michael Rutter and Marjorie Rutter chart out in nontechnical language a comprehensive and vivid map of human growth from cradle to grave Arguing that there are discontinuities as well as continuities to the growth process they trace how basic aspects of psychological functioning such as emotion and cognition change over the course of life The volume is organized around themes anger and aggression social relationships intelligence and language rather than specific age periods Thus we see the parallels between life crises and challenges at different times of life such as adolescence and old age This original approach also reveals the full significance of both resilient and maladaptive responses to stress and adversity The authors thoroughly mine decades of developmental research to transmute findings into brilliant nuggets of clinical wisdom Covering all factors genetic social historical cognitive biological that shape human development this pioneering book explores and explains not only the universal aspects of maturation but also how we each end up on our individual paths
