Creasman, 2017-07-20 Growing Leaders Within A Process toward Teacher Leadership will aid school administrators in the task of growing and empowering teacher leaders The goal of growing teacher leaders is to grow a school culture of shared decision making and collaborative leadership It is through this transformation that teacher leaders help school administrators to create a laser focus on student success The underpinnings of the book are based on academic research resulting in a seven step process to growing teacher leaders which is distinctive from other books about teacher leadership Schools may have several teacher leader candidates but it is the responsibility of the school administration to ensure that the right individuals are chosen to become part of the school s leadership team The role of teacher leadership can be diminished if the wrong individuals are selected In response to this the book offers school administrators a research based pragmatic growth process that ensures the right teachers are chosen to enter the leadership ranks at any school Growing and empowering teachers to be leaders is now critical in all schools Teacher Leadership and Professional Development Alex Alexandrou, Sue Swaffield, 2016-05-06 Interest in and knowledge of leadership and learning separately and together is an international and continuing phenomenon This book adds to a somewhat under researched aspect of the field It focuses both on a particular form of leadership teacher leadership and on a particular form of learning professional development It

considers the connection between teacher leadership and professional development and the first chapter relates this connection to a Leadership for Learning conceptual framework developed through an international three year project The book s chapters explore teacher leadership and professional development from a number of perspectives giving rise to three points of particular significance Firstly the chapters show that either by accident or design there is a growing cadre of teacher leaders emerging from a multitude of professional development activities and initiatives Secondly a number of new conceptual frameworks are put forward alongside the adaption and development of extant ones that add to the ever increasing theorisation of educational leadership and professional development literature Thirdly the chapters provide evidence of the connections between leadership and learning as conceptualised in the Leadership for Learning framework This book was originally published as a special issue of Professional Development in Education
