Development And Demographic Change In Taiwan:

Development And Demographic Change In Taiwan (1945-1995) Roger Mark Selya, 2004-05-31 This book describes and analyzes the demographic changes that took place in Taiwan between 1945 and 1995. It uses an interdisciplinary methodology so that different approaches to demographic change can be compared and contrasted. It attempts to evaluate Taiwan's experience so that lessons for the Third World can be extracted. The content and presentation of the material are deliberately designed to replicate the 1954 work of Barclay Demographic Change and Colonial Development in Taiwan. As such, the book seeks to provide the reasons that economic development without demographic change took place under the Japanese while development with demographic change took place under the Chinese. The volume is richly illustrated with some 82 original maps and graphs.

Population Growth and Socioeconomic Development Gaoqiao Xie, 1980

The Economic Consequences of Demographic Change in East Asia Takatoshi Ito, Andrew K. Rose, 2010-10-15 Recent studies show that almost all industrial countries have experienced dramatic decreases in both fertility and mortality rates. This situation has led to aging societies with economies that suffer from both a decline in the working population and a rise in fiscal deficits linked to increased government spending. East Asia exemplifies these trends and this volume offers an in-depth look at how long-term demographic transitions have taken shape there and how they have affected the economy in the region. The Economic Consequences of Demographic Change in East Asia assembles a group of experts to explore such topics as comparative demographic change, population aging, the rising cost of health care, and specific policy concerns in individual countries. The volume provides an overview of economic growth in East Asia as well as more specific studies on Japan, Korea, China, and Hong Kong. Offering important insights into the causes and consequences of this transition, this book will benefit students, researchers, and policy makers focused on East Asia as well as anyone concerned with similar trends elsewhere in the world.

Urbanization And Development Paul K C Liu, 2019-06-18 The growth and expansion of cities and the transition from a rural to an urban society are among the most critical links between population change and economic development. On the one hand, migration is one of the fundamental demographic processes associated with changes in the population of urban places; the changing distribution of population be
