Sternberg, David D. Preiss, 2022-11-19 This book

reflects on the various ways in which intelligence can manifest itself in the wide range of diverse contexts in which people live Intelligence is often viewed as being tantamount to a score or set of scores on a decontextualized standardized intelligence test But intelligence always acts within a sociocultural context Indeed early theorists defined intelligence in terms of adaptation to the environment in which one lives The tradition of decontextualization is old dating back to the very beginning of the 20th century with the development of the Binet Simon Intelligence Scales This tradition is not only old however but obsolete Because people live in different sociocultural as well as physical environments intelligence can take somewhat different forms in different places and even at different times The chapters in this edited volume show that intelligence viewed in the abstract is a somewhat vacuous concept it needs to be contextualized in terms of people's physical and sociocultural surroundings
