focuses on ES development as a software engineering endeavor and emphasizes that as such it should be subject to much the same discipline as conventional automated information system software. The guide is meant to be used in conjunction with accepted software development methods and standards such as Department of Defense DOD Standards 2167A and 7935.1, DOD Directive 7920.1, DOD Instruction 7920.2 and the OSD Major Automated System Review Council MAISRC Guidelines for Program Managers. This document presents a step by step guideline that addresses the managerial and technical risks of each phase in the software development life cycle of systems that contain ES components.
