U.S. Industrial Outlook ,1989 *Proceedings of the ... International IEEE Conference on Tools for Artificial Intelligence* ,2001 *The Web and Faith* Ayse Kok,2022-09-01 Computing technology is an indispensable feature of modern life Our rapid paced world seems more and more remote from the world narrated in sacred scriptures However despite its pervasiveness there remains a dearth of theological reflection about computer technology and what it means to live as a faithful individual in a digitally saturated society The Web and Faith provides a brief theology of technology rooted in the Islamic tradition and oriented around the grand themes of creation redemption and new creation The book combines a

concise accessible style with penetrating cultural and theological analysis Building on the work of Marshall McLuhan and Neil Postman and drawing from a wide range of enlightened Islamic thinkers the book situates computer technology within the big picture of the story of creation Technology is not neutral but neither is there an exclusively faith based form of technological production and use Instead this book guides us to see the digital world as part of a larger creation which is redeemable according to the law of faith Responsibly used technology can become an integral part of religious wisdom world wide *Journal of Artificial Intelligence in Education* ,1989 *The Prentice Hall Guide to Expert Systems* Robert A.
