The essence of outsourcing is simply engaging the services of an individual or organization outside your full time staff to handle certain aspects of your business plan These aspects may be public relations marketing clerical and administrative functions or IT management In fact with today s virtual environment there is really no part of the business that could not be outsourced effectively Of course the big guestion is whether or not there are any benefits to outsourcing especially for persons who are building their business on the Internet There are several good reasons to outsource certain functions Often times an Internet business is set up with a shoestring budget and one person doing all the work As the business grows it is easy to get caught up in dealing with general office functions such as answering emails handling correspondence and maintaining client lists By outsourcing your clerical support needs you can spend more time focusing on the expansion of your business not the day to day details of running it Second promoting your online presence is a full time job all by itself You can hardly manage that and still be involved in making the big decisions that impact the overall operations of your company Using outside agents to promote your presence and to stimulate sales makes it possible for you to do what owners need to do which is grow the companies roster of goods and services Last outsourcing allows you not to get bogged down with employee taxes withholding and providing a benefit package
