The Global Information Society Wendy Currie, 2000-05-18 The Global Information Society Wendy Currie The last few decades have witnessed profound changes in the structure culture management and technology of organisations Just as information technology offers both opportunities and threats to organisations the Internet and its potential for electronic commerce poses fresh challenges So far much hype surrounds the subject of electronic commerce and its possibilities for leveraging business advantage Whilst governments on both sides of the Atlantic urge companies to invest in Internet technology and develop e business past lessons from IT investment have often been disappointing Likewise the rapid growth of IT outsourcing in the 1980s and 1990s produced mixed results Whereas some companies successfully reduced costs and improved their performance through outsourcing others were permanently damaged as management failed to address important issues relating to the IT strategy and infrastructure The Global Information Society addresses the phenomenon of the global information society in the context of market technology management practice capabilities and skills and the role of government Designed for academics practitioners and students this book does not offer simple solutions to complex business problems Instead it critically evaluates models frameworks debates and observations relating to these five key themes within the global information society **Saturday Review of Literature** ,1945 *The Place of Information Technology in Management and Business Education* Ben-Zion Barta, Peter Juliff, 1997-01-31 The power of modern information systems and

information technology IS/IT offers new opportunities to rethink at the broadest levels existing business strategies approaches and practices Over the past decade IT has opened up new business opportunities led to the development of new strategic IS and challenged all managers and users of IS/IT to devise new ways to make better use of information Yet this era which began with much confidence and optimism is now suffering under a legacy of systems that are increasingly failing to meet business needs and lasting fixes are proving costly and difficult to implement General management is experiencing a crisis of confidence in their IS functions and in the chief information systems officers who lead them Earl and Feeney 1994 11 The concern for chief executive officers is that they are confronting a situation that is seemingly out of control They are asking What is the best way to rein in these problems and effectively assess IS performance Further how can we be certain that IS is adequately adding value to the organisational bottom line On the other hand IS executives and professionals who are responsible for creating managing and maintaining the organisation's systems are worried about the preparedness of general managers to cope with the growth in new technologies and systems They see IT having a polarising effect on general managers it either bedazzles or frightens them Davenport 1994 119
