Abstract

Introduction: Although deterrence can be traced back to the military literature and the writings of Carl von Clausewitz, deterrence theory nevertheless flourished in the Post-World War II era and after the advent of nuclear weapons. The deterrence strategy is especially important in some regions such as the Middle East, Eurasia and South Asia, which are among the most intense conflict zones in the world. **Research question:** What are the conceptual coordinates of the internationalization of deterrence as a theoretical framework and its application to Iran's deterrence strategy in the peripheral regions? **Research hypothesis:** In response to the main question of the article, using the case study method, the author proposes the concept of internationalization of deterrence and examines its application first by the great powers of the world and then by Iran in its peripheral regions including the Middle East, Eurasia and South Asia. The internationalization of deterrence means a situation where the deterrent power provides part of its military and security capabilities including weapons, forces, and allies to other actors who intend to raise the level of deterrence, increase its effectiveness and expands its geographical scope, thereby creating fundamental changes in the strategic calculations of a potential aggressor. Internationalization of deterrence using missile power and paramilitary groups has been a

Deterrence in the Middle East Aaron S. Klieman, Ariel Levite, 1993-01-01 A collection of essays which emerged from an international symposium of modern deterrence strategy held in 1991 at Tel Aviv University in the direct aftermath of the Gulf War

Deterrence in the Middle East Aaron S. Klieman, Ariel Levite, 1993 **Concepts of Non-Provocative Defence** G. Wiseman, 2001-12-18 This book examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars

The National Security of Small States in a Changing World Efraim Inbar, Gabriel Sheffer, 2013-09-13 The first part of this book is primarily devoted to analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world s small states

What Causes War? Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory s implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations
