Develop Your Management Potential:

Developing Managerial Skills in Engineers and Scientists Michael K. Badawy, 1995-04-14 If you're an engineer or scientist who has suddenly been thrust into the world of management you may find yourself thinking that managing people is more of a challenge than your former highly technical job. Veteran management consultant Michael K. Badawy couldn't agree more. He says, "The primary problems of engineering and R&D are practical mechanisms that strengthen technologists' management skills: issues in career planning and development, decision making and evaluation of engineering and R&D, and strategic thinking and planning skills." Badawy's down-to-earth language and practical examples bridge the gap between theory and practice, making it a snap for both the novice and the initiated to translate theory into everyday solutions. Plus, you'll find career guidance as well as up-to-the-minute coverage of current managerial training programs. A bounty of tables, charts, and diagrams further enhance *Developing Managerial Skills in Engineers and Scientists*, making this volume indispensable to all those technical professionals interested in becoming 21st-century managers.

Managing Projects in Health and Social Care Vivien Martin, 2005-06-29 *Managing Projects in Health and Social Care* is designed for anyone who is asked to manage a public services project but who lacks the experience or training to feel confident in this role. The book shows how to use project management techniques to ensure that your project will be successful. The key dimensions discussed are budget, time, feasibility, planning, scheduling, implementation, and evaluation. The book includes many examples to show how people have used the techniques described in health and care settings. There are clear explanations of how and when to use each technique and consideration of the differences between large and complex projects and smaller, less complicated ones. It is a valuable resource for anyone who wants to be sure that their project will make a useful contribution to improvement of health and care services.

Developing Management Skills James R. Carlopio, Graham Andrewartha, 2012 Carlopio's hallmark five-step learning approach: self-assessment, learning, analysis, practice, and application, and its modular structure help you tailor your study to the areas you need to focus on. This text is suitable for courses which have a specific focus on managerial skills such as capstone courses and leadership or communication skill courses. It is also well suited to corporate professional development training courses or simply as a resource for professionals seeking to become better managers. Publisher
