Developing Subject Knowledge In Design And Technology Food Science And Nutrition:

Learning to Teach Design and Technology in the Secondary School Gwyneth Owen-Jackson, 2013-01-11 Design and technology is a subject that interests and excites most young people. It requires them to work both practically and theoretically to investigate and research, design, plan, make and evaluate. It encourages creativity, decision making and problem solving as pupils get to grips with real needs and real products. Design and technology covers work with electronics, food materials such as wood, metal, plastics and textiles and requires the development of graphical skills, practical skills and theoretical knowledge and understanding. *Learning to Teach Design and Technology in the Secondary School* second edition aims to help student teachers develop their subject knowledge and professional knowledge and skills. It looks at the theory underpinning important issues and links this to practice in the classroom. Fully updated to take account of changes in the curriculum, there are new chapters on teaching graphics, 14-19 vocational qualifications and cross-curricular links to literacy, numeracy, citizenship and sustainability. There are also chapters on design and technology in the school curriculum, developing areas of subject knowledge, the importance of health and safety, the use of ICT in the teaching of design and technology, planning lessons, managing the classroom, assessment issues, the integration of citizenship and sustainability into design and technology, your own professional development. Bringing together insights from current educational theory and the best contemporary classroom teaching and learning, this book will prove an invaluable resource in enhancing the quality of initial school experience for the student teacher. *Learning to Teach Design and Technology in the Secondary School* Alison Hardy, 2020-10-01 *Learning to Teach Design and Technology in the Secondary School* is a core text for all those training to teach design and technology in the secondary school. It helps you develop subject knowledge, acquire a deeper understanding of the role, purpose and potential of design and technology within the secondary curriculum and provides the practical skills needed to plan, teach and evaluate stimulating and creative lessons. This fully updated fourth edition includes information on all areas of design and technology and on new subject requirements relating to exam qualifications. It includes three new chapters on the role of critiquing in design and technology education, transitions after secondary design and technology and using and producing design and technology education research. Designed to be read as a course or dipped into for support and advice, it covers each area of design and technology: materials, textiles, electronics and food. Integrating new curriculum topics such as emerging technologies into your teaching. Developing areas of subject knowledge: Health and safety, Planning lessons, Organising and managing the classroom, Teaching wider issues through design and technology, Assessment issues, Your own professional development. Bringing together insights from current educational theory and the best contemporary classroom teaching and learning, this book will prove an invaluable resource for students on all training routes as well as their mentors who aspire to become effective, reflective design and technology teachers. *A Practical Guide to Teaching Design and Technology in the Secondary School* Gwyneth Owen-Jackson, 2007-06-11 Containing a wealth

of practical activities and materials that provide excellent opportunities to analyse learning and performance within Design and Technology this book also includes case studies and examples of existing good practice and a range of tried and tested strategies Specially designed to be written in directly it provides a useful record of progress and is accompanied by a Companion Website Designed to be used by student teachers NQTs and beginning teachers this workbook covers each main specialist area of Design Technology electronics and communications technology ECT food technology materials technology and textiles technology Topics covered include design and technology in the school curriculum the importance of health and safety the use of ICT in the teaching of design and technology planning lessons managing the classroom assessment issues the integration of literacy numeracy citizenship and sustainability into design and technology your own professional development This book complements the market leading textbook Learning to Teach Design and Technology in the Secondary School also published by Routledge but can also be used equally successfully on its own Mentoring Design and Technology Teachers in the Secondary School Suzanne Lawson,Susan Wood-Griffiths,2019-08-21 This collection offers an evidence based approach to mentoring and supporting design and technology teachers and educators in the secondary school and provides tried and tested strategies to support this role Contributors offer tasks and reflections to inspire and motivate mentors to get the best out of beginning teachers in the early stages of their career Key topics explored include Helping new D T teachers appreciate the fundamental nature of design and technology and how this informs both why it is taught and how it is taught Understanding yourself as a mentor beliefs values and attitudes and how your experiences influence your approaches to teaching Observing design and technology teachers lessons and offering tools for observation and analysis Risk taking in the classroom moving teachers forward from pedestrian to innovative practice Filled with practical guidance on lesson planning risk taking and learning conversation Mentoring Design and Technology Teachers in the Secondary School offers advice and guidance to support mentors in developing inspirational D T teachers of the future This essential guide is perfect for mentors of beginning teachers whether trainee newly qualified or those who find themselves teaching the subject for the first time Huh: Curriculum conversations between subject and senior leaders John Tomsett,Mary Myatt,2021-09-18 Schools need to have purchase on the curriculum why they teach the subjects beyond preparation for examinations what they are intending to achieve with the curriculum how well it is planned and enacted in classrooms and how they know whether it s doing what it s supposed to Fundamental to this understanding are the conversations between subject leaders and their line managers However there is sometimes a mismatch between the subject specialisms of senior leaders and those they line manage If I don t know the terrain and the importance of a particular subject how can I talk intelligently with colleagues who are specialists This book sets out to offer some tentative answers to these questions Each of the national curriculum subjects is discussed with a subject leader and provides an insight into what they view as the importance of the subject how they go about ensuring that knowledge understanding and skills are developed over time how

they talk about the quality of the schemes in their departments and what they would welcome from senior leaders by way of support We have chosen this way of opening up the potentially difficult terrain of expertise on one side and relative lack of expertise on the other by providing these case studies They are suggested as prompts rather than the last word Informed debate is after all the fuel of curriculum development And why Huh Well Huh may be John s first response when he walks into a Year 8 German class but in fact we chose Huh as the title of our book as he is the Egyptian god of endlessness As Claire Hill so eloquently comments in her chapter Curriculum development is an ongoing process it s not going to be finished ever And we believe that Huh captures a healthy and expansive way of considering curriculum conversations
