Development Crises And Alter Vis:

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories The Politics of Urban Development argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

Challenging the State Merilee S. Grindle, 1996-02-23 The 1980s and 1990s posed great challenges to governments in Latin America and Africa Deep economic crises and significantly heightened pressure for political reform severely taxed their capacity to manage economic and political tasks These crises pointed to an intense need to reform the state and redefine its relationship to the market and civic society This book examines the paradox of states that have been weakened by crisis just as their capacity to encourage economic development and provide for effective governance most needs to be strengthened Case studies of Mexico and Kenya allow the author to analyse the opportunities available for political leadership in moments of crisis and the constraints on action provided by leadership goals and existing political and economic structures She argues that while leaders and political structures are often part of the problem they can also be part of the solution in building more efficient effective and responsive states

Dynamics of Development: General, political, and administrative Sudesh Kumar Sharma, 1978 Festschrift honoring Jagan Nath Khosla Indian educator and diplomat comprises articles on economic development and international relations
