Development Economics From The Poverty To The Wealth Of Nations:

Development Economics Yūjirō Hayami, 2001 A comprehensive and systematic account of the core topics in development economics This book examines the reasons why a few countries have achieved a high level of affluence while the majority remain poor and stagnant It represents an original combination of classical political economy modern institutional theory and current development issues bound together through the East Asian development experience This fully revised second edition also analyses some recent changes and newly emerged problems relevant to the global economy

Development Economics Yujiro Hayami, Yoshihisa Godo, 2005-02-03 Presbyterian minister John Witherspoon was a key figure politically and religiously in the formative years of the United States In this fresh account of Witherspoon's thought L Gordon Tait focuses on Witherspoon's piety the way Witherspoon believed that the Christian faith should take visible and practical form in ministry politics and everyday obedience and devotion The Piety of John Witherspoon is filled with photographs from Witherspoon's life and Tait's comprehensive treatment of Witherspoon makes a significant contribution to the understanding of his impact on church education and society

Development Economics : From the Poverty to the Wealth of Nations Yujiro Hayami, 2001-02-15 A comprehensive and systematic account of the core topics in development economics this book examines the reasons why a few countries have achieved a high level of affluence while the majority remain poor and stagnant It represents an original combination of classical political economy modern institutional theory and current development issues bound together through the East Asian development experience This fully revised second edition also analyses some recent changes and newly emerged problems relevant to the global economy This textbook provides a comprehensive systematic treatise on development economics combining classical political economy modern institutional theory and current development issues It has grown out of thirty years experience of teaching undergraduate and postgraduate students in the United States Japan and other parts of Asia The treatment is global although the organizing principle is the East Asian development experience Quantitative characteristics of Third World development in terms of population growth natural resource depletion capital accumulation and technological change are outlined but the central approach is comparative institutional analysis Development Economics addresses one major question Why has a small set of countries achieved a high level of affluence while the majority remain poor and stagnant Why in turn has the number of developing economies set on the track of closing their productivity gap with advanced economies been so limited One obvious factor underlying this global divergence is unevenness in the ability to adopt and develop advanced technology due in large measure to the difficulty experienced by low income economies in preparing appropriate institutions for borrowing advanced technology given their social and cultural constraints The major task of this volume is to explore the nature of these binding constraints with the aim of identifying the means to remove them Comparisons are made with countries where the constraints have been successfully lifted most notably Japan and East Asian NIEs This fully revised and updated second

edition also incorporates analyses of several recent changes and newly emerged problems relevant to the global economy the 1997 98 financial crisis in East Asia the Kyoto Protocol signed in 1997 at the Third Conference of Parties for the United Nations Framework Convention on Climate Change and the deceleration in growth of agricultural productivity in Asia Exploration of these issues provides important lessons on how to sustain economic growth based on technology borrowing

Development Economics Yūjirō Hayami, 2005 Hayami and Godo address the major question of why a small set of countries has achieved a high level of affluence while the majority remain poor and stagnant and looks critically at the social and cultural restraints which need to be overcome
