English Historical Linguistics. Volume 2 Alexander Bergs, Laurel J. Brinton, 2012-10-01 The Genesis of Grammar Bernd Heine, Tania Kuteva, 2007-10-05 This book reconstructs what the earliest grammars might have been and shows how they could have led to the languages of modern humankind Like other biological phenomena language cannot be fully understood without reference to its evolution whether proven or hypothesized wrote Talmy Givón in 2002 As the languages spoken 8 000 years ago were typologically much the same as they are today and as no direct evidence exists for languages before then evolutionary linguists are at a disadvantage compared to their counterparts in biology Bernd Heine and Tania Kuteva seek to overcome this obstacle by combining grammaticalization theory one of the main methods of historical linguistics with work in animal communication and human evolution The questions they address include do the modern languages derive from one ancestral language or from more than one What was the structure of language like when it first evolved And how did the properties associated with modern human languages arise in particular syntax and the recursive use of language structures The authors proceed on the assumption that if language evolution is the result of language change then the reconstruction of the former can be explored by deploying the processes involved in the latter Their measured arguments and crystal clear exposition will appeal to all those interested in the evolution of language from advanced undergraduates to linguists cognitive scientists human biologists and archaeologists *Approaches to Language: Data, Theory, and Explanation* Ángel J. Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts At the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance Edelman Phillips den Dikken Bernstein Tortora Sprouse Schütze Phillips 2013

Linguistics and Language Behavior Abstracts, 2002 *Language Universals* Morten H. Christiansen, Christopher Collins, Shimon Edelman, 2009-03-17 Languages differ from one another in bewildering and seemingly arbitrary ways For example in English the verb precedes the direct object understand the proof but in Japanese the direct object comes first In some languages such as Mohawk it is not even possible to establish a basic word order Nonetheless languages do share certain regularities in how they are structured and used The exact nature and extent of these language universals has been the focus of much research and is one of the central explanatory goals in the language sciences During the past 50 years there has been tremendous progress a few major conceptual revolutions and even the emergence of entirely new fields The wealth of findings and theories offered by the various language science disciplines has made it more important than ever to work toward an integrated understanding of the nature of human language universals This book is the first to examine language universals from a cross disciplinary perspective It provides new insights into long standing questions such as What exactly defines the human capacity for language Are there universal properties of human languages and if so what are they Can all language universals be explained in the same way or do some universals require different kinds of explanations from others *Language Universals* is unique in starting with the assumption that the best way to approach these and related questions is through a dialogue between a wide range of disciplines including linguistics cognitive neuroscience philosophy computer science and biology *Journal of Linguistics*, 2017 *Anthropological Linguistics*, 2002 *Studies in Language*, 2007 **The Evolution of Knowledge** Jürgen Renn, 2020-01-14 A fundamentally new approach to the history of science and technology This book presents a new way of thinking about the history of science and technology one that offers a grand narrative of human history in which knowledge serves as a critical factor of cultural evolution Jürgen Renn examines the role of knowledge in global transformations going back to the dawn of civilization while providing vital perspectives on the complex challenges confronting us today in the Anthropocene this new geological epoch shaped by humankind Renn reframes the history of science and technology within a much broader history of knowledge analyzing key episodes such as the evolution of writing the emergence of science in the ancient world the Scientific Revolution of early modernity the globalization of knowledge industrialization and the profound transformations wrought by modern science He investigates the evolution of knowledge using an array of disciplines and methods from cognitive science and experimental psychology to earth science and evolutionary biology The result is an entirely new framework for understanding structural changes in systems of knowledge and a bold new approach to the history and philosophy of science Written by one of today's preeminent historians of science *The Evolution of Knowledge* features discussions of historiographical themes a glossary of key terms

and practical insights on global issues ranging from climate change to digital capitalism This incisive book also serves as an invaluable introduction to the history of knowledge **Applied Linguistics** ,2005 **Proceedings** ,2001 **Proceedings of the North East Linguistic Society 30** North Eastern Linguistic Society. Meeting,2000 *Lingua* Albert Willem Groot,Anton Joannes Bernardus Nicolaas Reichling,2000 International review of general linguistics **Language** ,2007
