## **Development Of Modern Agriculture British Farming Since 1931:**

**The Development of Modern Agriculture** J. Martin, 2000-03-16 This highly readable and up to date history provides an informative critique of the causes and consequences of the modern agricultural revolution since the agricultural depression of the inter war period This includes evaluating the impact of the Second World War the post war scientific and technological revolutions and the metamorphosis in the role of the state It also examines the impact of the Common Agricultural Policy and the more recent attempts to rationalize production The book provides the essential background for an objective appreciation of modern agricultural development

**The Farmer in England, 1650-1980** Richard W. Hoyle, 2016-03-03 Farmers held a pivotal role in the capitalist agriculture that emerged in England in the eighteenth century yet they have attracted little attention from rural historians Farmers made agriculture happen They brought together the capital and the technical and management skills which allowed food to be produced It was they and not landowners who employed and supervised labour They accepted the risk inherent in agriculture paying largely fixed rents out of fluctuating and uncertain incomes They are the rural equivalent of the small businessman with his own firm employing people and producing for markets sometimes distant ones Our ignorance of the farmer might be justified by the claim that they are ill documented but in fact farmers were normally literate and kept records day books journals accounts This volume goes some way to counter the claim that a history of the farmer cannot be written by showing the range of materials available and the diversity of approaches which can be employed to study the activities and actions of individual farmers from the sixteenth century onwards Farm records offer invaluable insights into the farming economy which are available nowhere else In this volume accounts are used in a variety of ways as the means to access single farms but also in gross as a national sample of accounts to reveal regional variation over time For the later nineteenth and twentieth centuries the range of sources available increases enormously and farmers indeed farmer s wives too emerge as articulate commentators on their own position using correspondence to outline their difficulties in the First World War Some even developed second careers as newspaper columnists and journalists This book focuses attention back on the farmer and it is hoped will help to restore farmers to their rightful position in history as rural entrepreneurs

**The Death of Rural England** Alun Howkins, 2003 This engaging history of rural England and Wales during the twentieth century looks at the role of the countryside as both a place of work and of leisure and looks at the many crises it has suffered during that time

**Pyrrhic Progress** Claas Kirchhelle, 2020-01-17 Winner of the 2021 Joan Thirsk Memorial Prize from the British Agricultural History Society 2020 Choice Outstanding Academic Title Winner of the 2020 Turriano Prize from ICOHTEC Short listed and highly commended for the Antibiotic Guardian Award from Public Health England Long listed for the Michel D on Prize from the Royal Irish Academy Pyrrhic Progress analyses over half a century of antibiotic use regulation and resistance in US and British food production Mass introduced after 1945 antibiotics helped revolutionize post war agriculture Food producers used antibiotics to prevent and treat disease protect plants preserve food

and promote animals growth Many soon became dependent on routine antibiotic use to sustain and increase production The resulting growth of antibiotic infrastructures came at a price Critics blamed antibiotics for leaving dangerous residues in food enabling bad animal welfare and selecting for antimicrobial resistance AMR in bacteria which could no longer be treated with antibiotics Pyrrhic Progress reconstructs the complicated negotiations that accompanied this process of risk prioritization between consumers farmers and regulators on both sides of the Atlantic Unsurprisingly solutions differed while Europeans implemented precautionary antibiotic restrictions to curb AMR consumer concerns and cost benefit assessments made US regulators focus on curbing drug residues in food The result was a growing divergence of antibiotic stewardship and a rise of AMR Kirchhelle s comprehensive analysis of evolving non human antibiotic use and the historical complexities of antibiotic stewardship provides important insights for current debates on the global burden of AMR This Open Access ebook is available under a CC BY NC ND license and is supported by a generous grant from Wellcome Trust **Farming in**

**Lincolnshire 1850-1945** Jonathan Brown,2005 *The Record of Global Economic Development* Eric Lionel Jones,2002

This text comprises 12 chapters on global economic development and its relevance in Europe Asia and Australia offering an interpretation of world economic history **The National Farm Survey, 1941-1943** Brian Short,2000

During the Second World War there was concern as to whether Britain unable to import food from abroad would be able to feed the population Therefore the National Farm Survey was conducted during 1941 43 and described every farm in England and Wales in great detail Because of its sensitivity this material only became publicly available in 1992 after a 50 year closure period Information on farming types cropping and stocking machinery employment farm size and structure land ownership and farm buildings was provided for all farms which were larger than 5 acres at that time This book gives an overview of the Survey and provides the most complete Doomsday of British agriculture available including maps and illustrations of the areas surveyed at that time It is a unique source for measuring post war changes in agriculture environment and society

**Britain in 1998** Peter Catterall,Virginia Preston,1999 **Royal Historical Society Annual Bibliography of British and Irish History** Austin Gee,2001-10-18 The Royal Historical Society s Annual Bibliography of British and Irish History provides a comprehensive and authoritative survey of books and articles published in a single calendar year It covers all periods of British and Irish history from Roman Britain to the end of the twentieth century and also includes a section on imperial and commonwealth history It is the most complete and up to date bibliography of its type and an indispensable tool for historians **The Origins of the Organic Movement** Philip Conford,2001

With recent media hysteria and public concern about BSE and genetically modified crops we could be forgiven for thinking that the upsurge of interest in organic farming is a reflection of modern debate and a vindication of what left wing alternative groups have been advocating for years However in this first and authoritative history of twentieth century green culture Philip Conford reveals that the early exponents of the organic movement actually belonged more to extreme right wing conservative groups which were reacting

to industrialization and the increasing threat to traditional country life closely associated with socialist politics Drawing on a wealth of contemporary sources Conford chronicles the origins of the organic movement in Britain and America between the 1920s and 1960s and offers a perceptive portrayal of an organization which believes implicitly in the positive acceptance of the natural order and its laws The author demonstrates convincingly that organic farming is not a recent issue and traces the evolution of this now thriving movement With the recent EU directive banning animal products in animal feed together with the public backlash against genetically modified crops this book provides powerful reinforcement to a debate that has raged for over a century and which affects us all *Business Archives* ,2002 **World Agricultural Economics and Rural Sociology Abstracts** ,2000 The Women's Land Army Gill Clarke,2008 Land girls of two world wars depicted by the nation s artists *Taking Stock* David W. Howell,2003 After a shaky start the Welsh National Agricultural Society founded in 1904 was to surmount many problems and difficulties in its first 70 years or so to become by the 1980s one of the three major agricultural societies in the United Kingdom This work provides the Society s success story Rural History in the North Sea Area Erik Thoen,Leen van Molle,2006 This volume describes the outlines of the state of the art in the field of rural history for countries such as England the Netherlands Belgium Germany and Northern France The contributing authors all outstanding specialists in the field present an overview of the most important publications regarding the areas covered They also point to the most important research topics as well as indicating the most important lacunae in the field of rural history during the last decades The original texts of this book formed the basis of the international research group CORN which studies the economic development of the Northern European countryside in a comparative way The regional monographs are preceded by a short methodological introduction concerning the comparative methods used by this network as well as the possible pitfalls and problems **Healing the Herds** Karen Brown,Daniel Gilfoyle,2010-03-09 Healing the Herds Disease Livestock Economies and the Globalization of Veterinary Medicine offers a new and exciting comparative approach to the complex interrelationships of microbes markets and medicine in the global economy It draws upon fourteen case studies from the Americas western Europe and the European and Japanese colonies to illustrate how the rapid growth of the international trade in animals through the nineteenth century engendered the spread of infectious diseases sometimes with devastating consequences for indigenous pastoral societies At different times and across much of the globe livestock epidemics have challenged social order and provoked state interventions which were sometimes opposed by pastoralists The intensification of agriculture has transformed environments with consequences for animal and human health But the last two centuries have also witnessed major changes in the way societies have conceptualized diseases and sought to control them The rise of germ theories and the discovery of vaccines against some infections made it possible to move beyond the blunt tools of animal culls and restrictive quarantines of the past Nevertheless these older methods have remained important to strategies of control and prevention as demonstrated during the recent outbreak of foot and mouth disease in Britain in 2001 From the late

nineteenth century advances in veterinary technologies afforded veterinary scientists a new professional status and allowed them to wield greater political influence In the European and Japanese colonies state support for biomedical veterinary science often led to coercive policies for managing the livestock economies of the colonized peoples In western Europe and North America public responses to veterinary interventions were often unenthusiastic and reflected a latent distrust of outside interference and state regulation Politics economics and science inform these essays on the history of animal diseases and the expansion in veterinary medicine

**Land, Shops and Kitchens** Carmen Sarasúa, Peter Scholliers, Leen van Molle, 2005 The book discusses the concept of the food chain from a new perspective emphasising the historical dimension and conflicts The inclusion of technology as a core element is an original approach to food studies Thus technology is related to agricultural production packaging transport and storing wholesale and retailing catering and cooking Also the so called middle field such as political interference farmers education and scientific concerns is addressed This book pays attention to the history of agriculture including such varied themes as water supply fertilisers land use greenhouses and EU policy It tackles the history of shopping cooking health concerns and fast food eating places Technology is not taken for granted but seen as a field of conflict action reaction and negotiation perhaps best cast with the opposition fast food versus slow food The concept of the food chain necessitates to consider all these elements as a whole and to present them in one integrated volume

**The Front Line of Freedom** Brian Short, C. Watkins, John Martin, 2006 This book drawing together the work of 15 scholars is the first attempt to discover what really happened during the war in British agriculture It shows just how closely directed agriculture and individual farmers were in wartime and the determination with which uncooperative or failing farmers might be dispossessed It describes the tensions between agriculture and the military showing how the ploughing up campaign added land to the national farm but just at the time when the military were taking it for airfields and training grounds This revelatory book challenges received wisdom about farming in wartime It is essential reading for all interested in the evolution of twentieth century farming and in the historical origins of farming's present predicament

The Local Historian, 2006 Issues for autumn 1961 include the Standing Conference for Local History Bulletin
