Globalization John Glenn, 2007 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the

meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general *What could outsourcing bring to Bulgaria in an enlarged Europe?* Plamen Alexandroff, 2006-08-21 Inhaltsangabe Abstract Today there are numerous examples for the power of globalization It brings together people living thousands of miles away from each other through the technology of Internet allows them to taste fruits from the other side of the Earth makes them feel the consequences from events that do not have a direct impact on their lives The signs demonstrating the spread of economic globalization are more and more with each day and they could be noticed on wider and wider areas on the planet Global trade has proliferated driven by individuals huge multinational companies and countries But so has done also the flow of capital and humans across the world both in search of attractive places The ever more complex system of international relations in each sphere is more and more controlled by international organizations encompassing most of the countries in the world Among these the leading role has the World Bank the World Trade Organization and the International Monetary Fund But in these international bodies the leading role is played by trade groupings such as the EU or super powers such as the USA The least developed countries are isolated and suppressed by these super blocs or powers Another major actor in the globalization process the multinational company has spurred the anger of ordinary people with its blunt behavior and no respect for the environment For these reasons has emerged the antiglobalization movement which is growing more and more The process of globalization has brought wealth to some and even deeper poverty to others showing that it could offer many dangers but also many opportunities for the economic development of the countries One of these opportunities is the offshore outsourcing It could be defined as the process of entrusting a partner in a foreign with a complex long term mission defined in terms of results Outsourcing in the manufacturing sector is nothing new and it has existed ever since the appearance of the first big companies in the beginning of the 20th century But in the last decade or so offshore outsourcing operations in the services sector have started to proliferate more and more boosted by the emergence of the Internet the modern means of communication and computer technology There could be defined several major types of outsourcing according to various criteria A first group could be distinguished in accordance with the subject of the outsourced Statistical Abstract of the United States, 2009 *The Law of Globalization* Laurence Boule, 2009-01-01 There is a growing clamour particularly from the main beneficiaries of globalization that rules need to be established to govern the international economy with a specific focus on questions such as copyright violations trade sanctions and protections for foreign investment Those who perceive they are disadvantaged by globalization demand other legal protections in relation to employment cultural traditions and the environment
