The Adoption of Artificial Intelligence and Inertia in Higher Education James Hutson, 2025-10-01 This research monograph explores the complex resistance to integrating Artificial Intelligence AI within higher education institutions Despite the significant potential of AI to enhance education faculty adoption remains inconsistent and is often met with skepticism This book investigates key factors contributing to this resistance such as leadership deficits funding barriers cultural inertia and faculty attitudes toward technological change Drawing on qualitative and quantitative empirical data case studies from U S and international institutions and theoretical analysis the book uncovers underlying concerns about job security and professional identity It points to actionable strategies for overcoming these barriers and will be relevant for scholars researchers advanced students and educators grappling with issues navigating technological integration in academia and with interests in the sociology of education educational technology and higher education administration

Leading and Managing in the Digital Era Gregory Prastacos, Nancy Pouloudi, 2024-12-30 Rapidly emerging digital technologies such as artificial intelligence robotics the Internet of Things blockchain and virtual and augmented reality are driving profound changes in the workplace and society These technologies are radically transforming areas of cognitive and physical work while opening up new opportunities for complex decision making and increased efficiency As a result a new set of skills and a new style of leadership is required where digital savviness is essential together with an increased focus on collaboration transparency entrepreneurship diversity and inclusion This book organized in six parts presents key developments of the digital age in leadership management the future of work and business education Part I Governance in the Digital Era sets the scene by reviewing the challenges that the digital era presents for policy makers at national and global levels This research is complemented by research at the organizational level in Part II Strategy and Entrepreneurship in the Digital Era that discusses strategic issues that organizations of different sizes and levels of digital maturity face Part III Innovation and digital transformation presents examples from different sectors where AI and other innovative technologies are integrated in business Part IV The Future of Work focuses on the changing conditions of workspaces and their implications for human resource management and the future of work Part V Leadership and Skills for the Digital Era explores the impact of this changing business and societal landscape and studies the leadership style and skills needed in these conditions Finally Part VI The Future of Business Education studies how such skills and leadership may be cultivated in business education and draws lessons for the future The book is based on a selection of the best papers on this topic presented at the international conference LMDE held in Athens Greece in June 2023 [The Startup Protocol](#) Sally Ann Frank, 2024-03-01 There are lots of founders and lots of ideas floating around to help improve the delivery of healthcare services and positively affect the health of each of us as individuals as well as groups of patients afflicted by chronic or acute diseases Unfortunately many of these ideas never reach their full potential to improve patient outcomes or reduce costs of

care Sometimes it s because the idea isn t feasible or scalable Sometimes it s because the market isn t ready or regulators aren t ready And sometimes it s just because the founder or founding team has a blind spot or two Not only do these hidden blind spots ensure their failure but in many cases with better planning or a greater more holistic understanding of the market forces the blind spot can be overcome Or better yet the founder can realize that their idea is doomed from the start and consider other better options to solve the problem they are attacking The goal of this book is to help founders and their teams identify blind spots and avoid the most common pitfalls of starting a digital health company Having spent time with founders VC companies and most importantly prospective digital health startups patterns have emerged regarding those startups that are successful and those that die an often slow and painful death While not a recipe for guaranteed success having a guidebook of sorts can help navigate the perils associated with building a digital health company and can very likely improve the odds of success The book will go through the typical life cycle of an early stage company from ideation to the first few customer deals and highlight best practices for tackling the challenges at each stage including What problem are you trying to solve And why are you trying to solve this problem Who will help you build the solution and company How will you build the solution How will you pitch your company How will you sell your solution And what does success look like to you your stakeholders and your customers
