Public Sector Leadership Petri Virtanen, Harri Jalonen, Marika Tammela, 2022-11-30. Drawing its origins from the Human Relations movement of the early 20th century and from public leadership orientations emphasising human aspects, human-centred public leadership approaches leadership from a systems perspective. It explores societal institutions, organisations, and phenomena as an emergent system structure that manifests its existence through the multilateral and reciprocal interaction of its parts. Systems thinking and the need for systemic change suggest that one can only understand and improve a system by looking at how all the parts interact with each other and how they are integrated. The systemic nature of public leadership refers to dynamic learning mechanisms as they relate to the contents of leadership development tools, which are derived mainly from the changing mode of the operating environment, from the leaders' own experience, from their own personalities, from a learning-by-doing approach to leadership development, and from the ways in which leaders learn and unlearn. This book presents key concepts, approaches, origins, applications, and best practices to understand the evolution and nature of the human-centred approach in public leadership. It introduces a new public leadership paradigm that is needed in a complex, internationally interconnected social, economic, cultural, and political environment. Based on scholarly public leadership research, in addition to the authors' professional experience as academics.
