Geibel, 2025 Zusammenfassung This book presents selected contributions from the Fourth International Scientific Practical Conference ISPC 2024 held on October 10 11 2024 organized by IU International University East European University Adelphi University and the E Commerce Institute with contributions from Asia Africa Europe and the USA It discusses the challenges and opportunities of digital transformation and AI in different industries and introduces advanced research and solutions from both academic and professional perspectives The topics covered include artificial intelligence digitalization in healthcare legal systems corporate responsibility e commerce digital entrepreneurship and digital transformation in education One key topic is social commerce including live shopping as a blend of social media and e commerce The interaction between digitalization and sustainability is also explored The growing influence of artificial intelligence in the financial sector is examined as well Additionally investigations into the impact of digitalization on the education sector and the labor market are included All studies focus on the unique opportunities presented by digitalization and describe how these new potentials can be translated into concrete benefits The book is an engaging read for researchers and professionals interested in digital management one of the most significant developments of recent times **Building a Brand for Nerds Guide Book** Matt Kingsley, Let s be brutally honest You re smart You think logically You probably see patterns and systems where others see chaos And because of that you likely suspect that 90% of the social media marketing advice out there is complete unadulterated bullshit You re tired of the gurus shouting about passion and authenticity while offering zero repeatable process You re sick of chasing fleeting trends praying to algorithm gods and dumping time and money into strategies based on hope instead of math You see people celebrating vanity metrics likes followers that don t pay the bills and your analytical brain screams THIS IS STUPID And you re right It is stupid You re likely drowning in platform options contradictory advice and the overwhelming pressure to be everywhere doing everything all while feeling like you re fundamentally not built for this flashy often irrational world of marketing Maybe you ve tried gotten mediocre results felt like you wasted precious time you could have spent building something real and decided social media is just a rigged game you

can't win WRONG That analytical brain the one that craves logic data and efficient systems The one you might think is a disadvantage in this hype fueled circus That's your weapon That's your unfair advantage You just need the right operating system the right playbook designed for how you think Stop trying to play their game Play your game This book Social Media Marketing for Nerds isn't another collection of feel good fluff or soon to be obsolete hacks This is the blueprint for turning social media from a confusing time suck into a predictable profit driven machine built specifically for analytical minds like yours Inside we're not talking about finding your voice we're talking about Engineering Reach Deconstructing algorithms with logic so you control your visibility instead of begging for it Data Driven Platform Selection Using first principles and ROI calculations to choose where to invest your time ditching the FOMO Irresistible Offer Construction Applying the Value Equation to craft lead magnets and core offers so good people feel stupid saying no Because content isn't king the OFFER is Minimum Viable Content Machines Building systems for consistent high leverage output without the crippling perfectionism that kills momentum Sanity Metrics Over Vanity Identifying and tracking the few key numbers that actually predict revenue using data as a lie detector against marketing BS De Risking Paid Ads Turning ad spend from a gamble into a predictable investment by mastering the math LTV CPA Organic Compounding Systematically repurposing content for exponential visibility without exponentially increasing effort Leverage not just hard work Building Defensible Tribes Engineering community as a competitive moat that locks in customers and increases LTV Ruthless Automation Identifying bottlenecks and implementing tool stacks to reclaim your time for high value strategic work Authentic Selling via Process Using structured value driven conversations even in DMs to convert leads without feeling slimy Contrarian Content Weaponizing your unique insights and intellectual honesty to stand out and build real authority Competitor Deconstruction Reverse engineering competitor wins and fails using public data to accelerate your own learning curve Profile Funnel Optimization Turning your social profile into a high velocity conversion asset Stoic Resilience Installing the mental algorithms to process negativity and stay focused on the mission Scaling Beyond Yourself Frameworks for delegation and hiring so you stop being the bottleneck Future Proofing Building core assets and anchoring to timeless principles so your business thrives regardless of platform shifts This isn't about becoming someone you're not It's about weaponizing who you are It's about taking your natural inclination towards logic data systems and efficiency and applying it ruthlessly to the problem of acquiring customers profitably through social media Stop letting the marketing world make you feel inadequate Stop wasting time on strategies that feel fundamentally illogical It's time to leverage your analytical superpower This playbook gives you the frameworks the systems and the mindset to out think out systematize and ultimately out execute those relying on hype and guesswork You have the blueprint You have the advantage The only question is are you going to keep analyzing from the sidelines or are you ready to step into the arena and execute Stop drowning in inefficiency Stop leaving money on the table Get the book Build the machine Dominate your market *Artificial Intelligence, Co-Creation and Creativity* Francisco Tigre Moura, 2024-08-01

Artificial intelligence AI has deeply impacted our understanding of creativity and the human ability to generate creative outputs New applications for creative tasks are rapidly evolving and new tools are constantly being developed with much greater optimal capabilities Importantly the success of implementing such tools for creative tasks is still heavily dependent on human supervision and input Therefore it is vital to understand and critically reflect on the nature of co creative processes between humans and AI This book addresses such issues and provides insights into how humans can augment their capabilities for generating creative and innovative outputs by successfully co creating with AI The book is intentionally divided into three main parts to allow for a comprehensive and holistic perspective on human and AI co creation for creative tasks The sections are divided as follows Part 1 Principles of AI and Creativity Part 2 Critical Issues on Artificial Co Creation and Part 3 Industry Specific Discussions Consequently the book provides a holistic insight on the topic covering various issues and perspectives and enabling an accessible read to a broad audience For example chapters cover examples across different industry sectors including music arts science and management Furthermore the book covers critical questions involving copyrights ethical concerns relationship with algorithms and context based issues Only by critically reflecting on the intrinsic issues of AI and learning how to work with it effectively for creative purposes will we be able to benefit from its full potential to augment human creative abilities in an appropriate manner This novel edited collection is an essential read for scholars working on the intersection of AI creativity arts and management

Confronting Digital Dilemmas in Translator and Interpreter Training Pavol Šveda,Martin Djovčoš,Emília Perez,2025-10-30 This collection explores the challenges and opportunities brought on by developments in emergent technologies for translator and interpreter training Given the growing role of language professionals as mediators in an increasingly fragmented and globalized world this book offers an in depth look at the present and future of translator and interpreter training amidst these changes Featuring perspectives from established and up and coming scholars the volume is organized in three sections taking in turn different dimensions of the current training landscape These parts consider key topics including theoretical foundations and pedagogical innovations ethical considerations and social responsibility and ways forward for adapting training programs to better grapple with new tools Taken as a whole this book will be a useful resource for students and scholars in translation and interpreting studies as well as practicing professionals
